AIRYANEM Iranig alphabet, lexicon and articles in Iranig.

CATALOGS

FOOTNOTES IRA: equivalents of CHAPTERS, e.g. [:00:00:00:].

TRIADS p list of all triads that are used in this text.

GLOSSARY

LEXICON terms/jargons, & their common/arche definitions.

FALLACIES common/new fallacies (logic) & pseudo-fallacies.

GUIDANCE

ABBREVIATIONS abbreviations for technical terms.

SCRIPTS ISO 15924 codes.

LANGUAGES ISO 639 codes.

INITIALISM random initialisms.

CODICES abbreviations for codices.

CONTRACTIONS contractions, initialisms, crases and clippings.

TOPICS disciplines/fields hints, e.g. [topics].

CITATION

REFERENCES

p reference-list of citations via numerals, e.g. [0000].

RESOURCES

naming authors who came with an idea/work, e.g. [BOOLE].

BIBLIOGRAPHY

p list of all sources that are cited/used/consulted in p text in a quasi-form (simplified) of 'APA 7th ed.'. some of p entries are also begin with an abbreviated form of: an opus/author's name in [ALL-CAPS] as hint, e.g. [K&R].

CHAPTERS

[:01:02:03:]

ōis/mythos/be ☞ by/from/to ☞ Parthians/Medes/Sakas ☞

[:04:05:06:]

observer is one, observes oneness: Monas (M).

M is β Pythagorean Μονάς.

M is β basic concept number-one.

[:07:08:09:]

observer acts, observing manyness: Duas (Δ).

Δ is β Pythagorean Δυάς; Vesica-Piscis.

Δ is β basic concept number-two.

[:10:11:12:]

observer is many, observing emergence: Trias (T).

β Pythagorean Τριάς; triangle number-one.

T is from-self; aseitous basic concept number-three.

[:13:14:15:]

β act is β axiom.

one and may are two basic concepts.

one/act/many is arche.

[:16:17:18:]

there are three hypostases in arche.

hypostases exist $\therefore$ existence.

three hypostases = M/Δ/T.

[:19:20:21:]

Tetraktus = arche.

Tetraktus $\models$ Kosmos (K); β refinement of Pythagorean Tetractys.

K = Khaos/Logos/Pathos (K/Λ/Π) $\models$ Musica-Universalis.

[:22:23:24:]

three hypostases are quanta $\models$ Tetraktus is three quantum.

□ K quantized (quantized).

quantum $\models$ quantity.

[:25:26:27:]

K $\models$ totality $\models$ things.

□ $\forall$ things quantized (things).

reality = β totality of a system $\models$ existence.

[:28:29:30:]

Triadas (T) = M/Δ/T = 3hypostases $\models$ Sophia.

T $\models$ K.

T $\models$ {absoluteness, completeness, perfection, independency}.

[:31:32:33:]

there is β Meden in β centre of β Pythagorean circle.

β Meden is not a dot, and β Pythagorean circle is not a geometric shape.

β Pythagorean circle is β basic concept.

[:34:35:36:]

there is only one Pythagorean circle: $\wp$ Pythagorean circle.
there is no natural number yet, therefore there's no 2nd/3rd/etc things.
to ken one/act/many, to master visual-spatial intelligence.

[:37:38:39:]

one is $\wp$ Pythagorean circle.
many is $\wp$ Pythagorean circle and $\wp$ Pythagorean circle.
 $\wp$ duplication of Pythagorean circle.

[:40:41:42:]

$\wp$ observer observes $\wp$ equilateral triangle, emerging from-self.
 $\wp$ triangle is confined between Meden and Meden and $\wp$ intersection.
 $\wp$ top angle of $\wp$ triangle is Meden of $\wp$ Pythagorean circle.

[:43:44:45:]

$\wp$ duplication; circle and circle and circle: $\wp$ Pythagorean circle.
Meden and Meden and Meden: $\wp$ Meden of $\wp$ Pythagorean circle.
 $\wp$ triangle is $\wp$ self-emerging Movent: $\wp$ Pythagorean triangle.

[:46:47:48:]

Psyche = $\wp$ observer; $\therefore$ one acts; observes many and Movent.
 $\wp$ Pythagorean triangle is $\wp$ 1st stable shape.
 $\wp$ Pythagorean triangle is harmonious $\therefore$ harmony.

[:49:50:51:]

$M/\Delta/T$ are descriptions; not numbers or numeral/letter/string.
 $M/\Delta/T \models$ Ousia/Binding/Movent ($\wp/\wp/\wp$) = 3essences.
 $\wp/\wp/\wp$ are three ontological categories.

[:52:53:54:]

$K/\Lambda/\Pi \models$ Self-Physis/Psyche/Nous ($\wp/\wp/\wp$) $\models$ mythos.
 $\wp/\wp/\wp \models$ prototype/antitype/archetype = 3type1.
prototype/antitype/archetype $\models$ type/epitype/syntax = 3type2.

[:55:56:57:]

3type2 $\models$ whole/parts/hedone $\models$ beauty/art/aesthetic.
pattern/harmony/change $\models$ basic-concept/axiom/importance.
basic-concept/axiom/importance $\models$ Huvarshta/Huxta/Humata.

[:58:59:60:]

6type = 3type1 $\wedge$ 3type2; are $\wp$ pair of epistemological triads.
3hypostases $\models$ 3essences $\models$ 3type1 $\models$ 3type2, $\therefore$ 3essences/3type1/3type2.
every $\wp$ is in one or more $\wp$ with one or more $\wp$, $\therefore$ $\wp$.

[:61:62:63:]

$M/\Delta/T \models$ pattern/harmony/change.
 $M/\Delta/T \models$ oneness/manyness/dynamic.
 $M/\Delta/T$ is $\wp$ 1st $\wp/\wp/\wp \therefore$ Tetraktus, which continues.

[:64:65:66:]

$M \wedge \Delta \models$ digraph $\models$ ratio $\models$ inference.
digraph $\models$ $\wp =$ observer.
digraph $\models$ {principle, causality, semantics}.

[:67:68:69:]

graph $\wedge$ digraph $\models$ {intelligency, possibility, condition}.
inference $\wedge$ intelligency $\models$ rationality.
rationality $\wedge$ intelligence $\models$ Musica-Universalis.

[:70:71:72:]

$\mathfrak{B}$ $\models$ graph $\models$ extensionality (=).
 $\mathfrak{M}$ $\models$ aseitous changing/becoming/process $\models$ {aseity, uncertainty}.
Tetraktus $\models$ pan- $\mathfrak{B}$ = Spiritus; density $\models$ Soul.

[:73:74:75:]

an act (act $\models$ generation) by an $\mathfrak{D}$ is a $\mathfrak{B}$ between two $\mathfrak{D}$ $\therefore \mathfrak{D}=\mathfrak{B}=\mathfrak{D} \models \mathfrak{M}$.
 $\therefore (\neg (\mathfrak{p}$ Axiom of Extensionality) (arche)) $\therefore$ dualism fallacy.
 $\tau \models \Pi \models \mathfrak{M} \models$ intellect $\models$ observation $\therefore \mathfrak{P}$ observes.

[:76:77:78:]

$\Lambda \models$ Aletheia ($\mathfrak{A}$) $\models$ {order, compass} $\models$ truth $\models$ ethos; $\mathfrak{A} \wedge$ might $\models$ ethics.
 $\Lambda \models$ might $\models$ politics; $\mathfrak{P} \models$ will; $\mathfrak{P} \wedge \mathfrak{M} \models$ free-will.
 $\mathfrak{P} \rightarrow \diamond$ semantics $\rightarrow \diamond$ symbol $\rightarrow \diamond$ syntax $\rightarrow \diamond$ language $\rightarrow \diamond$ logic.

[:79:80:81:]

3type1/3type2 $\models$ concreta/abstracta; epitype/type $\models$ universal/particular.
antitype/epitype $\models$ actuality/potentiality.
type/epitype/syntype $\models$ object/interpretant/sign $\therefore$ signification triad.

[:82:83:84:]

$\mathfrak{D} \models$ {unity, certainty, eternity, infinity, necessity, immutability, be}.
 $\mathfrak{B} \models$ {multiplicity, state, position, entity, dependency, event, meaning}.
 $\mathfrak{D}=\mathfrak{B}=\mathfrak{D} \models$ {property, substance, tie} $\models$ quality; $\mathfrak{D} \wedge$ property $\models$ phenomenon.

[:85:86:87:]

contradiction $= \forall \neg$ Triadas; (+) $=$ binary-operation $= \mathfrak{D}=\text{digraph}=(\mathfrak{D}=\mathfrak{B}=\mathfrak{D})$.
(+) rests atop Π ; 3 = τ , 2 = Δ , 1 = $\mathfrak{M}$; 2 = (=) 1 (+) 1, 3 = (=) 1 (+) 2.
 $\mathfrak{x} \models$ Tetras, id est τ and $\mathfrak{M}$ $\therefore$ 3 + 1 and so on $\models$ ad infinitum progression.

[:88:89:90:]

$\mathfrak{x}$ enforces structure on mental state, demarcates imagination into 3mind.
 $\mathfrak{p}$ imagination/non-thought/thought ($\iota/\nu/\tau$) solves 3ab-initio-demarcation.
there's no reference to any bygoness, as arche reduces $\forall$ things to $\mathfrak{D}/\mathfrak{B}/\mathfrak{M}$.

[:91:92:93:]

$\mathfrak{p}$ forebears are sitting; in front of $\mathfrak{p}$ ever-changing fire; fire $\mathfrak{p}$ ocean.
 $\mathfrak{p}$ ocean is uncertain; $\mathfrak{p}$ forebears are looking; from $\mathfrak{p}$ ever-lasting Fire.
it's all changing and moving; but they're looking for $\mathfrak{p}$ route in $\mathfrak{p}$ fire.

[:94:95:96:]

$\mathfrak{p}$ route is in $\mathfrak{p}$ fire; that is a compass; $\mathfrak{p}$ point of $\mathfrak{p}$ compass is moving.
 $\mathfrak{p}$ N-point of $\mathfrak{p}$ compass is $\mathfrak{p}$ certainty; $\mathfrak{p}$ moving compass; within $\mathfrak{p}$ ocean.
it cannot be captured; $\mathfrak{p}$ route is impalpable; while directing to Pathos.

[:97:98:99:]

$\mathfrak{p}$ forebears are assured; with $\mathfrak{p}$ help of $\mathfrak{p}$ compass; moving within $\mathfrak{p}$ fire.
 $\mathfrak{p}$ closed-circuit: Fire and compass; compass and Pathos; Pathos and Fire.
it is $\mathfrak{p}$ Mythos; about arche; id est $\mathfrak{p}$ ultimate unifying first principle.

$\Delta \odot \mathfrak{M}$

⇒	Binding

arche goal	an arche enforces a structure in p man's mind. which leads to mind-demarcation of man's mind. therefore detection/identification/separation.
arche criteria	it is p most ultimate/unifying/1st-principle system. which secures rationality/intelligibility/coherency. therefore, it resolves p "mind-demarcation problem".
arche criteria goals	it must not lead to any contradictions. it must be intelligible to illiterates. it must be demonstrable in few seconds.

AIRYANEM

IRANIG.ALPHABET

Iranig alphabet is ꝑ script of ꝑ IRA:. it's based on ꝑ Polish alphabet & US-QWERTY compatible: Polish (Programmers) Keyboard, KLID:00000415 (pl).

IRANIG.LEXICON

HOW

þ list of bibliography, reference-list, and abbreviations are recorded & available in þ 'magi.order' file. roots (and lexemes) are mainly derived from dictionaries of Iranic languages listed in BIBLIOGRAPHY subsection.

this text contains my personal notes regarding my thoughts, writing, and speech in Iranig. þ script is based on þ Latin alphabet and incorporates modified letters from þ Polish alphabet & Polish (Programmers) Keyboard.

þ constructed language Iranig (IRA:) & its script IRAL:(based on Polish) were developed following þ standard approach regarding Iranic languages: an analogical-derivational, morphologically productive formation system.

while I am building on Iranian grammar, I'm striving toward þ excellence of Eastern Iranian languages (grammars, etymologies, ...) & I am utilizing þ full capacity of IRA:, via PIE:/PIR:/INE:, e.g. OSS:, XBC:, SOG:, etc.

this text proposes unifying major iranian languages under þ IRA: rubric. when a non-PIR element is needed, I give preference to GRC:, in order to extend IRA:. New styles have been devised to provide a firm ground, e.g.

pronunciations ('Ž /ǵ/' v 'Z /z/'); series comma (, etc.); reintroducing grammatic structures/phonologies from Eastern Iranic languages (AVE: ...). there's no capitalization in IRAL:, but for inserting Fremdwort in text.

HOW	this very introduction.

SOME RANDOM PHONOLOGICAL/MORPHOLOGICAL/SYNTACTICAL/ORTHOGRAPHICAL NOTES:

- * combine noun/adjective directly to form one descriptive compound word.
- * fixed phrases or proper nouns remain separate.
- * adj. + n. compounds are often concatenated, unless a hyphen is needed.
- * hyphens are optional for long or complex compounds to improve clarity.
- * if p concept is standard/descriptive, use a compound.

* if it's a proper name or idiom, keep words separate.

SUFFIX ⇒ o + SUFFIX

exception 1: þ Greek root ends with a vowel.

exception 2: þ Greek root ends þ same anlaut as SUFFIX.

e.g. 1.1.: myth + o + logy ⇒ mythology

e.g. 1.2.: myth + o + graphy ⇒ mythography

e.g. 2.1.: mammal + logy ⇒ mammalogy

ignition		giriśñ; girañiśñ
ignore	PAL:an-gnān-: 'an.gna:n	angnañdan
ignoring ptcp.adj.		angnañin
ignoring vbl.n.		angnañeśñ
ijaz		kutahgui
immigrant adj./n.		darmučand
immigrate vb.		darmučdan
immigrated ptcp.adj.		darmučde
immigrating ptcp.adj.		darmučin
immigration n.		darmučiśñ
immigrator n.		darmučgar
immigratory adj.		darmučgar
impact	OSS:зан:hit; strike	barwordan
impact erosion		barwordi farsayıśñ
impactor		barwordgar
impedance		vipałe
impediment	OSS:випæθ:impediment	vipałmañ
impertinence		ałbagande
impertinent	IRA:ceśmdaride	ałbagand
impertinentia		ałbagandia
impertinently		ałbagandih
implode		frukaftan
implosion	IRA:frukaft	frukubiśñ
import/export n.		darbart/osbart
import/export vb.		darbartidan/osbartidan
improvisation	PEO:vaz-:act; do; move	avazañiśñ
improvise		avazañdan
impudence		ałbage
impudent	PAL:aθbag/aθbiğ:bold	ałbag
impudentia		ałbagia
impudential		ałbagał
impudentious		ałbagog
impudently		ałbagih
in-situ		dar-ja
incandescence		fruzande
incandescent		fruzand
incise		darsundan
incision		darsuniśñ
incorporate		darāmixtan
incorporation		darāmisiśñ
independent random variable		avābaste kaťurik vartig
indigo		nil
inert adj.		laxt
inertia n.		laxtia

inertial adj.		laxtiql
infall		darunoft
infant	PAL:bābāg:child; infant	bābāg
infarction	FRA:infarctus	ānfārkʰtus
inflate		pandāmdan
inflation	IRA:bād; pof	pandāmišn
inflationary		pandāmišnāri
influenza	FRA:grippe; IRA:grip	ānfolānzā
ingredient		darāne
initiative		bongāmin
inlet		šaxābe
innovation		noāvarišn
innovator		noāvar
insect/insects		xastar/xastarta
inseminate		darśosardan
insemination		darśosarišn
insolent		daride
install vb.	IRA:instāl	darhdan
installation		darhišn
instep		rupay
instigate		āqāldan
instigation		āqālišn
institute	FRA:institut	nehād; anstito
institute vb.		nehādan
institution	IRA:nehād	nehādišn
interarm		andarbāzu
interatomic adj.		interatomik
intercloud		andarabr
interdisciplinary		andarhāvešāni
interest		andarast
interest vb.		andarastan
interested		andarastide
interesting		andarastān
interface		andardim
interfere		andarzadan
interference		andarzane
interferometer		andarzanemetr
interferometric		andarzanemetrik
interferometry		andarzanemetri
interim		andarim
interior adj./n.		daruni
intermittency		raftomaṇdi
intermittent		raftomaṇd
intermolecular		intermolekuli
interrupt		andarsaldan
interrupt/uninterrupt	IRA:gosixte/agosixte	andarsal/anandarsal
interrupter		andarsalgar
interruption		andarsališn
interstice		andarjāy
interstitial		andarjāyāl
interstitium		andarjāye
intervene		andargamdan
intervening ptcp.adj.		andargamin
intervention		andargamišn
intrinsic		darunaṇik
introspection		wodnegarišn

intuition		dargas
intuitionism		dargasism
intuitionist		dargasist
intuitive adj./n.		dargasin
invent		parəvdan
invention	IRA:nosəxt	parəvišn
inventor	IRA:parəvande	parəvgar
inviolability n.		penəhige
inviolable adj.		penəhig
inviolableness n.		penəhigi
inviolably adv.		penəhigih
inviolacy n.		penəhegi
inviolate adj.		penəhəg
inviolate vb.		penəhəgdan
inviolated ptcp.adj.		penəhəgde
inviolately adv.		penəhəgih
inviolateness n.		penəhəgi
inviscid	IRA:avošksən	avoškid
iodoform		yodoform
ion		yon
ionic adj./n.		yonik
ionization		yonišn
ionization/deionization		yonišn/vəyonišn
ionize		yondan
ionized/nonionized		yonde/nuyonde
ionizing ptcp.adj.		yonin
iridescence		rangineste
iridescent		ranginest
iris	IRA:iris	titak; zanbaq
iris diaphragm		titak diəband
iron		əhan
irreverent		zanande
island	AVE:əp-zam:water-land	əbzam
isolate vb.	PAL:yut:separate	vəyutidan
isolated	IRA:izole	vəyutide
isolation		vəyutišn
issue n.		borunəy; negarəni
issue vb.		borunəydan
iterate vb.	KUR:tir:p other	itardan
iteration		itarišn
iterative adj./n.		itarin
Jacobian		çəkobiən
jangle inj.		tleq; tleq-tleq
jasper	SOG:iešp:jasper	yašp; yašm
jelly		cele
jellyfish		medusa
jet		jet
jet stream		jet rəbe
jingle inj.		ding; ding-ding
jitter		jastojah
jizya	PAL:gazīdag	gazit
joke		jok
joker	IRA:çoker	joker
joule		çul
journal		çurnəl
journalism		çurnəlısm

journalist		ćurnalist
jovial		şang
joy/grief		woś/sug
jump		jahiśn
jungle		jangal
Kelvin		kelvin
Kepler		kepler
Keplerian		keplerian
kerwan		kervan
ket		ket
kettle; kettle hole; kettlehole; pothole		digçal; ketri
kick		lagad; lagat
kiloparsec		kiloparsek
kinematic adj.		sinemåtik
kinematical adj.		sinemåtikål
kinematically adv.		sinemåtikålih
kinematics		sinemåtiks
kinetic adj.		sinetik
kinetical adj.		sinetikål
kinetically adv.		sinetikålih
kinetics n.		sinetiks
Kirchhoff		kirśhař
kirschwasser		kriśvåse
kiss		bus
kit n.		kit
kit vb.		kitidan
kite	[geometry]	kót
kite	[zoology]	zaqan
kite bird		kurkur; xarjal
knee		zånu
knife		kårđ
la charte		maśrute
label	FRA:étiquette	etiket
laboratory		lab
lack		nast
lack vb.		nastidan
lackey	FARxådem	nokar
ladder		nardebån
lag		lek
lag vb.		lekdan
lagoon		kulåb
Lagrange		lågrańć
Lagrangian		lågrańćian
lake		daryåce
lamina	AVE:waraq	varaqe
laminar		varaqei
lamp	IRA:ceråq	låmp
lampshade	FRA:abat-jour	åbaćor
lapidem		stone
lapis; lapis lazuli		låćevard
lasagna		låzåniå
latent		nahån
latin		låtin
lattice		jåre
laugh		xande
laugh at sth		xanditan

launch		pataɓdan
launching ptcp.adj.		pataɓin
lava	IRA:godaze	laɓa
layabout		abirag
lazy	IRA:tenelaś	tanbal
lead	AVE:sru-; PAL:srub	sorb
leak		naśt
leather shoes		camuś carmi; orosi
lens		lenz
lensing ptcp.adj.		lenzin
lensing vbl.n.		lenzn
lenticula		kakmak
lest		mabaɗ
levitate vb.	PEO:vā-/vā-:go; move	awaɗagdan
levitation		awaɗagiśn
librate vb.		roxgardan
libration n.		roxgardiśn
libratory adj.		roxgard
lime		aħak
limp		lang
linguine		linguini
linguist		zabaɗist
linguistic		zabaɗistik
linguistics		zabaɗistiks
lion		śagr
lipstick	FRA:rouge à lèvres	roće lab
list		list
list vb.		listidan
listing		listn
litre; liter		litr
loaded language		baɗɗar zabaɗ
loan		vam; pām
loathe; loathing; detest; abhor		aɗiq
lobe		lap
long-serving		piśinedar
lottery		laɗaɗi
lout		laɗ
ludic		ludik
lump		qolonbe
lux		luks
luxury		lukse
lyceum	FRA:lycée	lise
lyric		lirik
macaroni		maɗaɗoni
Mach		max
machine		maśin
macroscopic		maɗroskopik
macrostate		maɗkrostaɗ
macroturbulence		maɗkroaśubnaɗi
made-up		mandaraɗvordi
magasin		maɗaze
magazine		gaħnaɗe
magma		maɗma
magnesium		manyazium
magnesium		manyezium
magnet		magnet

magnetar		magnetar
magnetic		magnetik
magnetics		magnetiks
magnetism		magnetism
magnetite		magnetit
magnetization		magnetanišn
magnetize		magnetandan
magnetized		magnetande
magnetogram		magnetgram
magnetometer		magnetmetr
magnetometry		magnetmetri
magneton		magneton
magnetopause	IRA:magnetmarz	magnetmoz
magnetorotational		magnetocarxišnał
magnetosheath		magnetniām
magnetotail		magnetdom
magpie		kalić
maison		mezon
makeup art		grim
makeup artist	FRA:maquilleur	grimor
maneuver		maṇovr
manganate		mangať
manganese		mangenez
manifest		nemusar
manifest vb.		nemusardan
manifestation		nemusařišn
manifold	IRA:basła	manifold
manoeuvre		maṇovr
mantle	IRA:rupuś	gušte
maple		afra
marathon		maṛaťon
march		reće
marsh		mordab
mascara		rimel
mash	FRA:purée	pure
mask		mařk
mask vb.		mařkdan
masking vbl.n.		mařkn
masquerade ball	FRA:bal masqué	bałmařske
match		mac
maxim		mařksim
maximum/minimum		biřine/kamine
means		caře
medal		medał
medicine		pezeřki
meet		mavařzdan
meeting vbl.n.	IRA:miting	mavařzn
melancholia		małixuliā
melodrama		melodrama
melt	PAL:hūgāg:(to) melt	hugağdan
meltdown	IRA:frugodaťxt	fruhugağ
melting vbl.n.		hugağn
meningitis		menanćit
Mensch ärgere Dich nicht		menc
merbromin		merkokorom
mesh		baṇce

metal		tupał
metallic		tupałik
metallicity		tupałlike
metalline adj.		tupałin
metalloid		tupałvər
methane		metən
methanol		metənol
methyl		metil
metre; meter		metr
metric		metrik
metrology	IRA:andəzəlogi	metrologi
mettle		rag
mica		mika
microform		mikroform
micrograph		mikrograφ
microlensing		mikrolenzn
micrometeorite		mikroşaxənağ
micrometer		mikrometr
micron		mikron
microprocessor		mikroprosesor
microscope		mikroskop
microscopic		mikroskopik
microscopium		mikroskopium
microstate		mikrostat
microturbulence		mikroaşubnaqi
migrant adj./n.		mućagand
migrate vb.		mućagdan
migrated ptcp.adj.		mućagde
migrating ptcp.adj.		mućagin
migration n.	IRA:kuc	mućagn
migrator n.		mućagar
migratory adj./n.		mućagar
militarism		militarism
milk		şir
millibar		milibar
mine		kənsər
mineral		kəni
mineralogy		minerałogi
miniature/miniaturist		miniətor/miniətorist
minimalist		minimałist
mirage		sarəb
mirror testing		əyene testn
mise en scène		mizənsen
miser		lacar
miserable		negunsər
miss	AVE:naθra:na:θrə:miss	nəsr
missile		muşak
missing ptcp.adj.		nəsrin
missing vbl.n.		nəsrn
mitt		dastpuş
mitten		dastmuć
mnemonic	GRC:μνημονικός	mnemonik
mnemonics	IRA:yədseparik	mnemoniks
moan		londeş; nəle
moan inj.		lond; lond-lond
mobile	IRA:miəvig	moból

mock adj./n.	PAL:nawîh (not real)	nəvîh
mock vb.	PEO:vāð-:deride; mock	vəžandan
mockers		vəžangar
mockery	IRA:rişxand	vəžangari
modernism		modernism
molar		molər
molasses		moləş
mold		kapak
mole		mol
molecular		molekuli
molecule		molekul
monitor	IRA:pahregar	monitor
monitor vb.		monitordan
monkey	PAL:kpyk':kabig	kabig
monologue	IRA:takgui	monolog
montage		montaç
morse code		mors kod
morsel		tek
mosaic		mozəik
moss		xaze
motley		golcin
motor		motor
motorcycle; motorbike	FRA:motocyclettes	motorsiklet
mottle		caparak

___GLOSSARY___

___LEXICON___

1st-cause:

first-cause:

[ARISTOTLE]

p primary cause.

p 1st uncaused cause.

p mover.

p unmoved mover:

GRC:ὁ οὐ κινούμενον κινεῖ:that which moves without being moved.

prime mover:

LAT:primum movens:prime mover.

movens:

ptcp. nom.

LAT:movens:moving; mover.

movent:

adj.

that moves or is moved; moving.

movent:

n.

something that moves or is moved.

3ab-initio,

ab-initio:

starts directly from 1st-principles.

3beauty-ab-initio:

3beauty:

3art-ab-initio,

3science-ab-initio,

3ethos-ab-initio.

3art-ab-initio:

3art:

pattern/harmony/change.

3science-ab-initio:
3science:
 basic-concept/axiom/importance.

3ethos-ab-initio:
3ethos:
 Huvarshta/Huxta/Humata.

3ab-initio-demarcation:
 detection/identification/separation
 of 3beauty-ab-initio.

3first:
 basic-concept/1st-principle/1st-cause.
 first-concept/1st-principle/1st-cause.

3mind:
 imagination/non-thought/thought.

3laws:
 LID/LNC/LEM.

3modes:
 necessity/possibility/contingency.

3protocols of communications:
 3laws/vocabulary/language.

3protocols of formal communication:
 arche/formlang/natlang.

3protocols of interaction:
 arche/metlang/semantics.

3protocols of verbal communication:
 arche/3laws/natlang.

a-seity:
aseity:
aseitous:
 LAT:ā se.
 LAT:ā-se.
 ENG:from self.
 exists of and from itself, i.e.
 non-derivative and non-dependent.

abductive argument:
 it is doubtful for p premiss(es) to be true
 and p conclusion to be false.

abstract algebra:
modern algebra:
 p study of algebraic structure of various sets.

abstract:
 a set of types and epitypes.

abstraction:

↳ emergence of concepts and principles from idea.

absurdity:

being nonsense, unsound, or irrational.

access question:

how to gain epistemic access to modal propositions.

account:

explanation of concept/principle/procedure.

acquainted knowledge:

familiarity with things, often via perception.

actus essendi:

act of being.

actus purus:

pure actuality; ↳ absolute perfection.

adequate determinism:

[DOYLE]

randomness in our thoughts about alternative possibilities
does not directly cause our actions.

adjacent edges:

[BONDY]

two edges which are incident with a common vertex.

adjacent vertices:

[BONDY]

two vertices which are incident with a common edge.

aesthetics:

↳ study of art.

aether:

↳ material that fills ↳ region of ↳ universe beyond
↳ terrestrial sphere.

affect:

underlying experience of feeling and emotion.

affection:

fondness:

↳ state linked to a feeling and emotion.

agreement:

[linguistics]

syntactic co-variation in form between elements
reflecting grammatical relations.

algebraic signature:

[model]

[HODGES]

A signature with no relation symbols.

algorithm:

an effective procedure for calculating p values of a function.

allegorical interpretation:

quadriga:

an interpretation with p assumption that
 p text has various levels of meaning.

allegory:

a story with symbolic hidden meaning.

allophone:

a contextually determined variant of a phoneme that
does not change lexical meaning.

alternative logics:

non-classical logic:

non 0th/1st-order logics.

anacoluthon:

a grammatically inconsistent expression
with syntactic deviations.

anagogic interpretation:

p eschatological reading.

Anahita:

symbolizes

woman.
life.
birth.
water.
Venus.
wisdom.

secures

certainty.
logic.
maths.

analogical reasoning:

reasoning based on analogy.

analogues:

two things which have been compared.

angle:

p union of two rays with a common endpoint.

animal communication:

p biocommunication among animals.

antecedent:

[logic]

p first half of a hypothetical proposition.

antecedent:

protasis:

if-clause:

p dependent clause expressing p condition.

apostrophe:

[semiotics]

altering p direction of speech from p audience to
some third party entity.

arbitrary code transmission:

a so-called verbal communication which suffers from
deficiency in verbal communication protocol.

archaic:

of or pertaining to arche.

arche,

arche:

p ultimate unifying first principle.

arche criteria:

ultimate/unifying/1st-principle.

ultimate:

foundational:

p eternal absolute basis for all modalities.

eternal:

eternity:

eternality:

timeless.

non-temporality.

absolute:

unconditionally non-derivative and non-dependent.

principle:

a theorem with wide applicability.

principle:

[linguistics]

linguistic context and social context.

1st-principle:

first-principle:

an axioms or a postulate of an axiom system.

thing:

[CHURCH]

anything nameable.

entity:

LAT:entitas.

sth that exists, real or imaginary.

being:

DEU:Sein.

an entity, which satisfies ϕ property of a class.

real:

ϕ state of being a part of reality.

reality:

[set-existence] (real or imaginary)

ϕ totality of a system, known and unknown.

[imagination] (non-imaginary)

a non-imaginary being.

exist:/non-exist:

existence:/non-existence:

[set-membership]

set-membership atomic formula,

aka

ϕ satisfaction of Axiom Schema of Separation.

hypostasis,

hypostasis:/hypostases:

ϕ fundamental underlying state of existence of Kosmos.

hypostasis:/parousia:/apousia:

existence/presence/absence.

Monas:

Keyumars:

Oneness.

Duas:

Anahita:

Twoness.

Trias:

Mithra:

Threeness.

Triadas:

Mehregan:

3hypostasis:/3hypostases:

Monas/Duas/Trias.

Keyumars/Anahita/Mithra.

Ousia/Binding/Movent,

Ousia:/Ousiai:

GRC:Οὐσία/Οὐσίαι.

ϕ ontological existence.

Binding:

ϕ ontological stand.

Movent:/Movents:
p ontological becoming.

homoousios/homoousion:
n./adj.acc.
GRC:ὁμοούσιος/ὁμοούσιον.
same in ousia.

essence:
LAT:essentia.
an ontic entity.

3essences:
Ousia/Binding/Movent.

substance:
chemical substance:
[sci]
a unique form of matter with
constant chemical composition
and
characteristic properties.

object,

object:
a definable thing.

object/subject,
[col]

object:
a thing, being observed.

subject:
an observer, observing an object.

[linguistics]

[ENGLISH]

object:
an entity, involved in p situation.

subject:
p function in clause structure that,
in active clauses describing action.

object:
mathematical object:
[maths]
an object, utilizable in
formulae
or
deductive reasoning
or
mathematical proofs.

e.g.

numbers, expressions, equations, sets, theorems,
proofs, functions, differentiation, matrices,

geometric objects, transformations, diagrams.

object:
[semiotics]
p entity, state of affairs, or concept
to which a sign refers.

property:
a characteristic of an object.

argument based on signs:
[HURLEY]
proceeds from p knowledge of a sign to
a claim about sth that p sign symbolizes.

argument of function f :
(from set A to set B)
an $a \in A$.

Aristotelian square of opposition:
traditional square of opposition.

arithmetic:
p study of p integers and arithmetics.

arithmetics:
arithmetical function:
number-theoretic function:
a function from p set of positive integers (domain)
to a subset of p complex numbers (range).

arity of an operation:
p numbers of operands of an operation.

ars-combinatoria:
p method of combinations part mathesis-universalis.

ars-inveniendi:
ENG:art of invention.
p method of synthesis part of mathesis-universalis.

ars-judicandi:
ENG:art of judgement.
p method of analysis part of mathesis-universalis.

Arshtat, i.e.:
symbolizes
Logos,
aka
Asha.
secures
p Aletheia,
aka
Arta.

art:

p cultural emergence of 3beauty-ab-initio.

art-ab-initio demarcation:

 p ability of demarcating between art and non-art.

Artificial General Intelligence:

AGI:

 uberman-capacity AI.

artificial intelligence:

 p study of intelligence.

asceticism:

 abstinence from sensual pleasures.

attribute:

 [logic]

 a feature of a thing.

auditory system:

 p sensory nervous system for p sense of hearing.

Avestan:

 Old Avestan and Younger Avestan.

axiology:

 p study of values.

axiom schema:

 an expression,
 with one ore more open formulae,
 which defines zero or more axioms.

axiom system:

 a classical axiom system or a modern axiom system.

axiom:

 [arche]

 a principle of a system,
 accepted without proof.

axiom:

 [logic]

 a formula of a formal language,
 accepted without proof.

axiom:

axiom A is proof P :

 [proof]

 formula A , which itself is a P of A .

axiom:

axiomatic:

axiomatize:

 [geometry]

 a general statement.

babbling:
 babble:
 babbler:
 a nonsense speech, employing
 nonsense-words, pseudowords, cant, exotic jargons, etc.

base:
 base form:
 [linguistics]
 [GRAMMAR]
 p uninflected form.

base:
 base word:
 [linguistics]
 [ALLEN]
 that part of a word which is unchanged in inflection.

base morpheme:
 lexical base:
 [GRAMMAR]
 an element in word structure to which a process can apply.

basic concept:
 an undefined concept

binary question:
 polar question:
 general question:
 yes-no question:
 a question which can only be answered by
 an affirmative or negative response.

binary relation:
 binary-relation:
 (on a set A)
 a subset of $A \times A$.

biocommunication:
 p intraspecific or interspecific communication among species.

biology:
 p science of life.

biosemiotics:
 p science of meaning making processes in p living organisms.

book of p dead:
 a book of spells which connects p world to p underworld.

Boolean square of opposition:
 modern square of opposition.

bunch:
 a collection of similar objects,

growing or fastened together.

calculating:
to perform calculation.

calculation:
p mathematical process of transforming p set of inputs
into p set of outputs.

calculus-universalis:
p universal TM.
UTM.

category theory:
p theory of structures
and
their inter-relations.

category:
[linguistics]
a class of grammatically alike expressions.

category:
mathematical category:
an object of five sub-objects:
objects,
morphisms,
assignment operation(s),
a composition operator,
an identity operator.

category mistake:
category error:
p erroneous ascribing of a thing or property
to an ontological category or predicand,
respectively.

catharsis:
cleansing of mental state by expressing it.

causa sui:
self-caused; self-generated.

causal determinism:
[SEP]
every event is necessitated by antecedent events and conditions
together with p laws of nature.

causality:
[arche]
directed edges of a digraph.

causality:
p relationship between a cause and its effect(s).

character:

[semiotics]
GRC:χαρακτήρ.
a semiotic sign, symbol, grapheme, glyph, etc.

characteristic:
[logic]
sth differentiating of a thing.

characteristica-universalis:
p mathematical lingua-universalis.

charactonym:
a name of character with a symbolic meaning.

chastity:
refrains from sexual activities.

chemistry:
p study of p properties
and
transformations of matter.

Chinvat:
p judgment of covenants by
Mithra/Sorush/Rashnu.

Chista:
symbolizes
rationality.
secures
Nous.

circumference:
length of a circle's outline.

civilization:
nations under same order.

class complement:
everything non-class.

class:
all sets which satisfy some formulae.

classical axiom system:
p set of
basic concepts,
derived concepts,
axioms,
theorems.

classical logic:
standard logic:
Frege-Russell's logic.

classification:

to assign objects to some classes.

classify:
to make classification.

classifying a class of structures:
[HODGES]
grouping p structures into subclasses,
whereupon proving that every structure in p collection
does belong in just one of p subclasses.

clause:
[linguistics]
[GRAMMAR]
a grammatic unit of a subject-predicate relationship.

clause function:
subject,
predicator,
object,
complement,
adverbial.

cliché thinking:
using folk wisdom as loaded language to end an argument

cliché:
overused to p point of absurdity.

clump:
a small collection.

cluster:
a collection of similar objects,
growing or appear together.

co-premiss:
a non-main premiss which is logically necessary for
 p validity of an argument.

code or system:
code/system:
[semiotics]
an organised set of conventions and rules
that govern how signs are combined and interpreted.

codomain of function f :
(from set A to set B)
 p set B .

collection:
a number of objects,
closed together.

collective unconscious:
 p unconscious mind

and
shared mental concepts.

combinatorics:
arranging objects according to some rules.

commentary:
[philology]
an accompanying line-by-line
or
word-by-word explication of a text.

common ground:
p set of propositions that p interlocutors have agreed to treat
as true.

communication,
communication:
[semiotics]
p transmission of signs between agents
by means of a shared code and a physical medium.

communication:
p sign-mediated transmission of meaning across
syntactic/semantic/pragmatic levels.

communication protocol:
a protocol for establishing communication.

formal communication protocol:
a common arche/formlang/natlang.

nonsense:
nonsense communication:
a meaningless communication.

verbal communication:
p set of written language and spoken language.

verbal communication protocol:
a common arche/3laws/natlang.

vocal communication:
p communication through p auditory system via p vocal tract.

communication,
modes of discourse:

rhetorical modes:
four traditional categories of written verbal communication:
argumentation, description, exposition, and narration.

argue:
argumentation:
a communication that supports a belief about sth.

clarify:

clarification:
a communication that makes sth more comprehensible.

describe:
description:
a communication that displays characteristics about sth.

dialogue:
a verbal conversational exchange between two or more entities.

discourse:
 $\mathfrak{p}$ process of refining $\mathfrak{p}$ information in a common ground.

elaborate:
elaboration:
to explain sth in detail.

explain:
explanation:
a reasonable clarification.

explicate:
explication:
to explain sth in great details.

expose:
exposition:
a communication that provide information about sth.

interlocutor:
an entity involved in a conversation or dialogue.

narrate:
narration:
a communication that tells a story about sth.

community:
a human settlement with shared mores and norms.

complete graph:
[BONDY]
a simple graph in which any two vertices are adjacent.

complete:
[complexity]
it is among $\mathfrak{p}$ hardest problems in $\mathfrak{p}$ complexity class.

complete:
complete theory:
[logic]
 $\forall$ (closed formula φ) in $\mathfrak{p}$ language $\mathcal{L}$ of a consistent theory T ,
 $(T \vdash \varphi) \vee (T \vdash \neg\varphi)$.

completeness:
[logic]
a formal system s is complete with respect to property P ,

if φ (formula having P) is a theorem in S .

complexity theory:

↳ study of complexity factors.

compounding:

[semiotics]

↳ formation of a new word by
combining two or more independent lexical stems.

computability theory:

recursion theory:

↳ study of computability and definability.

computability:

↳ study of computable functions.

computable function:

a function for which an algorithm exists.

computable function:

any function which is computable by an algorithm.

computable relation:

a set $A \subseteq \mathbb{N}$ is computable,
if there is a computable, total function F ,
 $\ni \forall n \in \mathbb{N} \ F(n) = 1$, if n is in A and $F(n) = 0$, if $n \notin A$.

computable relation:

computable/recursive/decidable

computable:

capable of being computed.

computably enumerable relation:

computably-enumerable/recursively-enumerable/semidecidable

computably enumerable set:

a set A is computably enumerable
IFF
it is ↳ domain of some computable function.

computably enumerable set:

a set $A \subseteq \mathbb{N}$ is computably enumerable,
if there is a computable function F ,
 $\ni \forall n \ F(n)$ is defined
IFF
 $n \in A$.

compute:

to make computation.

computation:

a well-defined calculation.

computational complexity theory:

formulating a formal criterion for what it means for
a mathematical problem to be feasibly decidable.

computational complexity:

complexity:

↳ quantity of computation for computing a computable.

computational problem:

a problem that may be solved by an algorithm.

compute:

to perform computation.

computer:

a computing machine.

computing:

capable of performing computation.

concept:

[arche]

a set of vertices.

concept:

a well-defined idea.

conceptualism:

[col]

conceptualized explanation of universality of particulars
in mind.

conceptualize:

[col]

to form an idea of sth in mind.

conclusion:

↳ proposition, derived from premisses, via inference rules.

concrete:

[arche]

a set of antitypes.

concurrent constants:

[CHURCH]

constants which have ↳ same denotation.

concurrent forms:

[CHURCH]

two forms which agree in value.

conditionals:

↳ linguistic expressions about contingency.

conditionals,

0th-conditionals:

implicative conditionals:

factual conditionals:
what happens/happened if ...

conditionals,
1st-conditionals:
predictive conditionals:
what will happen if ...

conditionals,
2nd-conditionals:
hypothetical conditionals:
what would happen if ...

conditionals,
3rd-conditionals:
counterfactual conditionals:
counterfactuals:
what would have happened if ...,
at certain possible worlds.

conditionals,
indicative conditionals:
what could be true.

conjugation:
conjugated:
[GRAMMAR]
a connected scheme of all p inflectional forms of a verb.

conscientious:
[OED]
habitually governed by a sense of duty.

consequent:
[logic]
 p second half of a hypothetical proposition.

consequent:
apodosis:
then-clause:
 p main clause expressing p result.

consistency:
one that does not lead to a logical contradiction.

consistent:
there is at least one line on which
 p truth-values are both true.

constant:
[logic]
a proper name,
having a denotation.

constant:
[maths]

a proper name,
having a number,
as its denotation.

construction:
conventional pairing of specific syntactic structures
with a meaning.

contingency:
contingent (partial: not-impossible part):
true in at least
one possible world.

contingency:
contingent (partial: not-necessary part):
false in at least
one possible world.

contingency:
contingent:
neither a tautology
nor a contradiction.

contingency:
contingent:
neither necessary
nor impossible.

contingency:
contingent:
not necessarily true
and
not necessarily false.

contingency:
contingent:
not necessarily true,
but possible.

contingency:
contingent:
true in at least
one possible world
and
false in at least
one possible world.

contradicting:
adj.
that which contradicts.

contradiction:
contradictory:
logically false:
necessarily false:
false in

every possible interpretation.
IFF unsatisfiable.
all false.

contradictory:
adj.
having p quality of contradicting.

contradictory n.:
a contradictory proposition.

contraposition:
[logic]
switching subject and predicate terms,
and
replacing subject and predicate terms,
with their term complements.

contrary:
[logic]
p relation that exists between two statements
that are necessarily not both true.

convention:
shared agreed upon norms.

conversation:
[arche]
interactive communication between two or more entities.

converse binary function:
$$((x,y) \in R \varphi \leftrightarrow (y,x) \in R \psi) \wedge$$
$$(\forall (x,y) \ni (x,y) \in R \varphi: \varphi(x,y) = \psi(y,x)).$$

converse:
conversion:
[logic]
switching subject and predicate terms.

conversion factor:
a ratio of units that is equal to unity.

convert:
[logic]
turn in direction or positin.

conviction:
a strong belief.

coprime:
relatively prime:
mutually prime:
 $\text{GCD}(a, b) = 1.$

copula:
are; aren't.

corollary:

an auxiliary theorem of p original theorem,
as a special case,
which may not require a proof.

correspondence theory of truth:

truth is a to/with a fact.

cosmic voids:

dark space:

spaces between filaments which contain very few or no galaxies.

countable:

of cardinality ω .

counterargument:

an objection to an objection.

criterion/criteria:

a principle of quality whereby sth is judged.

critic,

critic:

one who communicates pronounces judgement on sth.

criticism:

constructing judgement about p qualities of sth.

criticize:

to say you disapprove of sth.

critique:

a piece of writing discussing p qualities of sth.

critique:

systematic study of a discourses.

literary criticism:

evaluation and interpretation of literature.

cult:

clans with shared theology/rite/value.

cultural determinism:

culture determines behaviours.

custom:

repeatedly performed shared behaviours and events.

data point:

a datum within a dataset which represents a characteristic.

datum/data:

LAT:datum.

a collection of values conveying information.

decidability:

a true/false decision problem is decidable if
there exists an effective procedure for
deriving $\mathfrak{p}$ correct answer.

decision problem:

a computational problem that can be posed as
a yes-no question of $\mathfrak{p}$ input values.

declarative:

[linguistics]
[GRAMMAR]
a formal syntactic category,
by $\mathfrak{p}$ subject preceding $\mathfrak{p}$ verb,
used for making statements.

declension:

[GRAMMAR]
 $\mathfrak{p}$ variation of $\mathfrak{p}$ form of a noun, pronoun or an adjective,
to express different grammatical cases.

decoding of arbitrary code:

$\mathfrak{p}$ process of decoding a group of intelligible arbitrary codes
into strings of intelligible codes.

definition,

definability:
 $\mathfrak{p}$ study of definable set.

definable set:

an n -ary relation on $\mathfrak{p}$ domain of a structure whose elements
satisfy some formula in $\mathfrak{p}$ 1st-order language of that structure.

define:

LAT: *dēfinīre*.
to create definitions.

defined symbol:

[logic]
a non-primitive symbol,
together with its definition,
i.e. not a symbol of $\mathfrak{p}$ formal language,
as an abbreviation,
for an expression
of $\mathfrak{p}$ formal language.

definition:

a phrase which assigns a meaning to another phrase.

definiendum:

$\mathfrak{p}$ phrase which is to be defined.

definiens:

LAT: *dēfiniens*.
 $\mathfrak{p}$ defining phrase of a definition.

definition by genus and difference:
a definition, by identifying a genus term and p differentia.

definition by subclass:
a definition,
by naming subclasses of p class, denoted by p definiendum.

definitional argument:
p conclusion depends on p definition of some phrases used in
p argument.

ambiguous definition:
a definition which creates equivocatory meaning.

contextual definition:
[WEBSTER]
a definition,
in which p meaning of a phrase is determined by
defining p meaning of p expression containing p definiendum.

demonstrative definition:
ostensive definition:
a definition,
by pointing to p members of p class, denoted by p definiendum.

etymological definition:
a definition,
by indication of ancestral/historical development of p phrase.

enumerative definitions:
a definition,
by naming p members of p class, denoted by p phrase.

extensional definition:
denotative definition:
a definition,
by identifying p members of p class, denoted by p definiendum.

figurative definition:
a definition, by employing metaphors, allegories, etc.

intensional definition:
a definition,
by indication of attributes of p sense of p phrase.

lexical definition:
a definition,
by employing common meaning of a phrase,
which often exists in a dictionary.

obscure definition:
a definition which creates hidden or defective meaning,
due to defective language.

operational definition:

a definition, by assigning a procedure to p phrase,
which determines p phrase's denotation.

precising definition:
a definition which reduces p vagueness of a phrase.

stipulative definition:
a definition for p first time.

synonymous definition:
a definition,
by using another phrase, with p same sense as p definiendum.

theoretical definition:
a definition, by assigning a theory to p phrase,
which characterizes p phrase's denotation.

vague definition:
a definition which creates borderless cases.

degree of truth:
p interval in which truth-values shall be identified.

demarcation:
detection/identification/separation.

deontic norms:
norms of obligation/duty/permission.

deontology:
principle-based normative ethical theory.

derivation:
[linguistics]
morphological processes that create new lexemes
by adding affixes or altering word structure.

derived concept:
a concept being defined in term of basic concepts.

derived quantity:
quantities which are defined in terms of base quantities.

derived standard:
standards which are defined in terms of base standards.

derived unit:
units which are defined in terms of base units.

descriptive statistics:
[WEISS]
methods for organizing and summarizing information.

designation:
[semiotics]
a sign that directs attention to an object, typically

in context, functioning as a deictic index.

designation, e.g.:
topological maps.

descriptive statistics:
[WEISS]
methods for organizing and summarizing information.

[WEISS]
imposing controls,
then observational study,
thus establishing causation.

determinism:
all events are causally inevitable.

Deucalion:
GRC:Δευκαλίων.
p son of Prometheus.

deixis:
[linguistics]
context-dependent expressions requiring information
about p speech situation.

diagram:
[semiotics]
an icon that represents relations or structural correspondences
between elements.

dialetheism:
there are statements which are both true and false.

dictionary:
a set of lexemes.

directive:
[linguistics]
a usage label,
indicating p function of a clause,
as issuing a command or order.

displacement vector:
a vector,
which represents a displacement.

DNA replication:
synthesis of an exact replica from one original.

doctrine:
codification of beliefs or instructions.

domain of discourse:
p set of entities over which certain variables may range.

domain of function f ; $\text{dom}(f)$:
(from set A to set B)
p set A .

double-predestination:
a supreme entity chooses who to be saved or damned.

duty:
a commitment to do some actions regarding some state of affairs.

ecstasy:
GRC:ἔκστασις:ecstatic.
GRC:ἔκστατικός.
heightened state of awareness of p object
and
diminished awareness of other objects.

edge of a graph:
[BONDY]
a member of $E(G)$,
disjoint from V ,
indicated by a line.

effective procedure:
a procedure for solving a problem,
by any intuitively effective means,
from a specific class of problems.

element of tuple:
objects which belongs to a tuple.

elements of clause structure:
linguistic units, used in p functional analysis of clauses.

elements of clause structure,
p five elements of clause structure:
[linguistics]
[GRAMMAR]
subject, verb, object, complement, adverbial.

emergent:
a property,
which is an outcome of some other properties.

emergentism:
belief in emergence.

empty class:
null class:
p class that has no members.

empty extension:
terms denoting p empty class (null class).

empty graph:
[BONDY]

$E(G)=\phi$.

a graph in which no two vertices are adjacent.

enthymemes:

a syllogism,
missing a premiss or conclusion.

entropy of a random variable:

p average level of information inherent to
p variable's possible outcomes.

enumeration:

(of p set)
a 1-1 correspondence between p set and p natural numbers.

enumerative induction:

inductive generalization:

[HURLEY]
proceeding from p knowledge of a selected sample to
some claim about p whole group.

epistemic certainty:

no rational grounds for doubting.

epistemic justification:

p property of belief that qualifies it as knowledge
rather than opinion.

epistemic truth:

p truth in p mind.

epistemological holism:

confirmation holism:

[QUINE]
no single statement can be confirmed or disconfirmed
by an empirical test,
but rather by a theory.

epistemology:

p theory of knowledge.

equal classes:

two classes which have p same elements.

equivalence relation:

(on a set A)
a relation which is
reflexive/symmetric/transitive.

equivalent sets:

two sets which have p same elements.

esoteric interpretation:

p allegorical interpretation of p secret meanings.

ethos:

GRC:ἠθος:ethic.

'ought-to' concept/principle/procedure (s).

ethos-ab-initio demarcation:

↳ ability of demarcating between ethos and non-ethos.

euphoria:

GRC:εὐφορία.

↳ intense experience of
 pleasure,
 well-being,
 happiness.

evident:

that which is easy to be seen or understood.

evidentiality:

↳ expression of sources of information.

excitability:

sensitivity:

↳ ability of an organ or organism
to detect external stimuli.

exegesis:

a critical interpretation of a text.

expert opinions:

non-research based reports,
from organizations and expert panels.

exposition:

a full explanation of sth.

expository passage:

a topic sentence followed by one or more sentences
which develop ↳ topic sentence.

expression:

[linguistics]
an n -tuple of words.

expression:

logical expression:

[logic]
an n -tuple of primitive symbols of a formal language.

expression:

mathematical expression:

[maths]
a syntactic n -tuple,
which depends on ↳ context.

expression:

semiotic expression:

symbol: [broad]

[semiotics]
a group of signs that represent an idea.

expression (action):
[col]
things that people do,
in order to show their
ideas,
opinions,
feelings.

expression (vocal):
[col]
things that people say,
in order to show their
ideas,
opinions,
feelings.

expression (written):
[col]
things that people write,
in order to show their
ideas,
opinions,
feelings.

fable:
mythologic tale.

fact,
actual fact:
a fact about how things are.

fact,
brute-fact:
an unexplained fact.

fact,
epistemically brute-fact:
an unexplained fact due to epistemic limitations,
which may be resolved in p future.

fact,
mathematical fact:
a theorem.
a true mathematical datum.

fact,
matter of fact:
depending upon actual fact,
not speculative,
nor fanciful.

fact,
metaphysically brute-fact:

an unexplained fact due to non-existence.

fact,
modal fact:
 a fact about how things
 must be,
 or
 could be,
 or
 couldn't have been.

fact,
scientific fact:
 a true scientific datum.
 IRA:daŋe aŋmun paŋir.

fact:
synthetic claim:
 a proposition which is true, at-least,
 under one interpretation,
 in one possible world.

falsifiability:
 a hypothesis which can be logically contradicted by
 an empirical test.

fatalism:
 all are subjugated to fate.

fate:
 a predetermined course of events.

feature:
 [logic]
 sth important of a thing.

feeling:
 [APA]
 a self-contained phenomenal experience.

fiction:
 an imaginary story.

field:
 a set,
 together with two operations of
 addition
 and
 multiplication.

figure:
 p location of p two occurrences of p middle term in p premisses.

finitary:
 a proof which deals with concrete objects
 in a constructive manner.

finite:
 [linguistics]
 a linguistic unit carrying tense.

finite graph:
 [BONDY]
 $V(G)$ and $E(G)$ are finite.

finite rule in formal system F :
 [SHOENFIELD]
 [2]
 a rule which has only finitely hypotheses.

finite-valued logic:
 finitely many-valued logic:
 truth-values are discrete.

finitely axiomatizable:
 a theory,
 axiomatized,
 without axiom schemata.

folklore:
 shared oral lores.

form,
 form:
 [arche]
 a mental entity.

 form:
 [logic]
 an expression, with one or more free variables.

 form:
 [logic]
 p resulting expression of replacing one of p constituent part
 of a complex name by a variable.

 form:
 [semiotics]
 p shape a linguistic unit.

 0-place predicate:
 0-arity predicates:
 proposition: [broad]
 statement: [narrow]
 sentence: [narrow]
 [zero]
 0th-order logic predicates.
 a declarative clause which is either true or false.

 1-place predicate:
 1-arity predicates:
 predicate:

1st-order logic predicates with quantification over individuals.

2-place predicate:

2-arity predicate:

predicate:

2st-order logic predicates with quantification over individuals/sets.

0th-order logic:

propositional logic/calculus:

sentential logic/calculus:

p formal analysis of propositions

and

their inter-relations.

1st-order logic:

predicate logic/calculus:

quantificational logic/calculus:

p formal analysis of predicates

and

their inter-relations.

2nd-order logic:

p formal analysis of 2-place predicates

and

their inter-relations.

3rd-order logic:

p formal analysis of 3-place predicate

and

their inter-relations.

abduction:

abductive inference:

abductive reasoning:

retroduction:

an argument which draws possible inference.

i.e.

deriving possible causes from effects.

argument: [broad]

reason: [narrow]

to justify or explain sth.

e.g. an attitude, a belief, a fact, or an action.

assertion:

a statement,

putting forward sth as be believed to be true,

factual or justified.

atomic formula:

prime formula:

atom:

[formlang]

a formula,

created by applying an n -ary relation symbol to n terms,

which contains neither logical connectives nor quantifiers.

categorical proposition:

[logic]

a proposition, relating two categories (classes).

categorical syllogism:

a syllogism, consisting of three categorical propositions.

causal inference:

causal reasoning:

p process of identifying causality.

claim:

a statement, putting forward sth as shall be shown to be true, factual or justified.

closed formula:

a Boolean-valued WFF, with no free variables.

conjecture:

an unproved statement that is believed to be true.

deductive argument:

it is impossible

for p premiss(es) to be true

and p conclusion to be false.

deductive explosion:

principle of explosion:

any proposition can be inferred from a contradiction.

deductive inference:

an inference based on truth-preserving inference rules.

deductive reasoning:

an argument which draws certain inference.

deductively valid inference rule:

a necessarily truth-preserving deductive inference.

defined formula:

[logic]

a non-formula expression,

i.e. not a formula of p formal language,

formed by combination of

primitive symbol(s)

and

defined symbol(s),

as an abbreviation,

for a formula

of p formal language.

direct inference:

statistical syllogism:

proportional syllogism:

arguing from a almost true partial generalization to a particular case.

disjunctive syllogism:

modus tollendo ponens:

MTP:

a syllogism, with one disjunctive statement as its premiss.

entailment:

logical consequence:

$\vdash$ relationship between statements,
which hold true when one statement logically follows
from one or more statements.

form concurrent to a constant:

[CHURCH]

for every assignment of values to free variables,

$\vdash$ value of $\vdash$ form is $\vdash$ same as $\vdash$ denotation of $\vdash$ constant.

formula:

formula of a language:

[logic]

an expression, denoting a mathematical fact.

gradatio:

polysyllogism:

sorites:

a chain of syllogism, missing intermediate conclusions.

good/bad argument:

a set of propositions where one or more premiss(es)
support/doesn't support $\vdash$ conclusion.

hypothetical syllogism:

a syllogism, with one or two conditional statement,
as its premiss(es).

inductive argument:

it is improbable

for $\vdash$ premiss(es) to be true

and $\vdash$ conclusion to be false.

induction hypothesis for objects:

[SHOENFIELD]

[5]

if objects having property P satisfy $\vdash$ laws of definitions.

induction hypothesis for theorem:

[SHOENFIELD]

[6]

if all of $\vdash$ hypotheses of a rule of F have property P ,
then $\vdash$ conclusion of $\vdash$ rule has property P .

induction on objects:

induction on objects in collection C :

[SHOENFIELD]

[7]
every objects in C has property P
if objects having property P satisfy φ laws of definitions.

induction on theorem:
proof by induction on theorems in a formal system F :
[SHOENFIELD]

[8]
every axiom of F has property P .
if all of φ hypotheses of a rule of F have property P ,
then φ conclusion of φ rule has property P .

inductive reasoning:
an argument which draws probable inference.

inference: [narrow]
 φ reasoning process expressed by an argument.

inference: [broad]
argument: [narrow]
[HURLEY]
a series propositions,
one or more of which, i.e. φ premisses, are claimed to
provide support for one of φ others, i.e. φ conclusion.

loosely associated statement:
statements without inferential-relationship
about φ same subject.

n -ary predicate:
a subset of φ set of n -tuples in A .

open formula:
[formlang]
a formula, formed by one or more atomic formulae,
via only logical connectives.

particular proposition:
a claim about one or more particular members of a class.

predicable:
LAT:praedicabilis.
that which may be stated or affirmed.

predicable:
[logic]
a possible relation in which
a predicate may stand to its subject.

predicate:
a subset of a set of some objects in φ set.

predicate:
[first]
a non-logical symbol, which represents a property,
applicable to individual objects.

predicate:
[HOL]
a non-logical symbol, which represents a property,
applicable to a collection of objects.

predicate:
[linguistics]
that which follows p subject, in a declarative clause.

predicate:
[formal]
a non-logical symbol, which represents a relation.

predicative complement:
[linguistics]
[ENGLISH]
a property ascribed to an entity referred to by p subject.

prediction:
[HURLEY]
proceeding from p knowledge of p past to a claim about p future.

proposition: [narrow]
p meaning of a statement.

proposition:
[geometry]
theorems and geometric constructions.

proposition:
[linguistics]
semantic contents of sentences.

proposition:
[maths]
a theorem of lesser elementary or immediately obvious,
which may be stated without proof.

proposition:
[metalang]
p referents of that-clauses.

proposition:
[philosophy]
p objects of belief.

propositional formula:
[formlang]
[zero]
a syntactic propositional WFF.

propositional knowledge:
awareness of facts which can be expressed via
declarative clauses.

self-contradictory proposition:
an necessarily false proposition.

sentence:
[linguistics]
[GRAMMAR]
p largest unit of analysis in grammar.

sentence:
closed formula:
ground formula:
[formlang]
[model]
a formula, without free variables.

statement: [broad]
[logic]
a general term for
propositions (0-place predicate),
predicates (1-place predicate), etc.

statement:
[linguistics]
a usage label, indicating p function of a clause,
as stating or declaring something.

states of affairs:
a particular which has one or more universals.

syllogism:
an argument consisting of two premisses and one conclusion.

symbolic terms:
[formlang]
[first]
names, indefinite names, variables, arbitrary terms.

term:
[logic]
an expression, denoting a mathematical object.

valid inference:
an inference based on valid inference rules.

WFF:
well-formed formula:
[formlang]
a syntactic formula.

formal,
formal analysis:
an analysis with regard to p form, in abstraction from p matter.

formal language:
formlang:
 $L(F)$:

[MARTIN]

a logistic system with a fixed interpretation of denotata given to some of its expressions, together with its primitive symbols.

formal system:

[formal]

$\mathcal{P}$ syntactical part of an axiom system, consisting of $\mathcal{P}$ set of language, axioms and rules.

formal theorems:

$\mathcal{P}$ theorems of $\mathcal{P}$ object language.

formal theory:

a set of closed formulae in a formal language.

formalism:

an emphasis on forms over content or meaning.

free variable:

a variable,

which has replaced one of $\mathcal{P}$ constituent part of a complex name.

function:

grammatical function:

[linguistics]

[GRAMMAR]

$\mathcal{P}$ syntactic role that

a linguistic unit plays within a higher linguistic unit,

e.g. a phrase, clause, sentence.

function:

[logic]

(from set A to set B)

a mapping from $\mathcal{P}$ set of some objects in A , to some objects in B .

function:

Frege function:

[logic]

[TYPE]

[FREGE]

[3]

"if in an expression, a simple or a compound sign has one or more occurrences and if we regard that sign as replaceable in all or some of these occurrences by something else

- but everywhere by $\mathcal{P}$ same thing -

then we call $\mathcal{P}$ part that remains invariant in $\mathcal{P}$ expression a

'function', and $\mathcal{P}$ replaceable part $\mathcal{P}$ 'argument' of $\mathcal{P}$ function."

galaxy:

a system of

stars, stellar remnants, interstellar gas, dust, dark matter; bound together by gravity.

gene duplication:

doubling of p amount,
as a result of replication.

general proposition:
a claim about all p members of a class.

generalization of a theorem:
a higher abstraction theorem from which
 p original theorem can be deduced as a corollary.

generalized inductive definition:
generalized inductive definition of a collection c :
[SHOENFIELD]
[4]
a set of laws, each of which says that,
under suitable hypotheses,
an object x is in c .

genetic determinism:
man's behaviours and beliefs are fixed by genes.

genus:
[logic]
a relatively larger class.

geographical determinism:
geography determines culture.

ghost-word:
a lexicalized typo.

gibberish:
jibber-jabber:
gobbledygook:
a meaningless speech.

glossary:
a collection of technical terms.

golden mean:
golden middle way:
GRC:Μηδὲν ἄγαν.
nothing in excess.

goði:
goðar:
hofgoði:
hofgothi:
Nordic order shaman.

grammar,
grammar:
[formal]
syntactic rules defining valid expressions within p system.

grammar:

[lang]
p study of linguistic structures
(rules).

grammar:
[linguistics]
rules governing well-formed combinations of linguistic units.

grammar:
[logic]
rules for forming well-formed formulas (WFFs)
in a logical system.

graph theory:
p study of graphs.

graph:
[BONDY]
p ordered pair $G = (V(G), E(G))$,
together with an incidence function ψ .

group axioms:
associativity,
identity,
inversion.
associativity/identity/inversion.

group theory:
p study of groups.

group:
an ordered pair of a set and a binary operation on p set,
which satisfies group axioms.

hu,

εŮ:
eu:
hu:
hub:
xu:
xup:
xub:

good.

ahura,

ahura:
master of Hur.

ahura mazda:
master of Hur and Mazda.

Huvarshata/Huxta/Humata,
AVE:Huvaršta/Hūxta/Humata.
PAL:Hukunišnih/Hugōwišnih/Humenišnih.
PAL:Hukunišn/Hugōwišn/Humenišn.
IRA:hućir/hugoft/hument.

Huvarshta:
Logos-wise/eu/good act.

Huxta:
Logos-wise/eu/good.
secures
contract/oath/covenant.

Humata:
Logos-wise/eu/good mind.

Hur/Mazda/Hurmazd,
Hur/Mazda/Hurmazda,
Hur:
Logos-wise real.
viz.
reality,
non-imaginary,
non-mental.

Mazd:
Mazda:
Logos-wise imaginary.
viz.
imaginary,
non-reality,
mental.

Hurmazd:
Hurmazda:
p Golden mean and harmony of Hur and Mazda.

yasna,
yasna:
school of thought.

Huryasna:
p philosophy of Hur.
e.g. Buddhism; Daoism.

Mazdayasna:
DEU:Mazdaismus.
p philosophy of Mazda.
e.g. Mazdakites.

Hellenistic order:
an order with Hellenistic origin.
e.g. Hellenism.

Hellenistic religion:
a religion with Hellenistic origin.

hermeneutics:
p theory of interpretation.

higher-order logic:

HOL:

p union of 1st-order, 2nd-order, ..., nth-order logic.

historical determinism:

events in history are inevitable and determined by prior forces.

homomorphism:

[model]

[HODGES]

(from structure A to structure B)

a map which carries each operation of A to

p operation with p same name in B .

hypothesis/hypotheses:

[logic]

p premiss of a proof.

hypothesis/hypotheses:

[sci]

a proposed explanation for a phenomenon.

hypothesis,

scientific hypothesis:

a testable hypothesis.

hypothesis,

working hypothesis:

a provisionally accepted hypothesis,
proposed for further research.

hysteria:

morbidly excited state.

icon:

[semiotics]

a sign that represents its object through resemblance
or shared qualities.

idea,

belief,

belief:

a propositional attitude

in which an agent holds a proposition to be true.

belief system:

a structured set of interrelated beliefs
held by an agent.

idea:

[arche]

a set of types and epitypes.

idea:

[economics]

a conceptual model representing

preferences, expectations, or strategies guiding choice.

idea:
[linguistics]
[semiotics]
a conceptual unit conveyed through symbols, language, or signs.

idea:
[logic]
[maths]
an abstract object or proposition
that can be defined, manipulated, and reasoned about formally.

idea:
GRC:ιδέα.
[philosophy]
a mental construct representing an object of thought,
capable of being apprehended and reasoned about.

idea:
[politics]
a belief or principle
that informs governance, ideology, or policy formation.

idea:
[psychology]
a mental construct encoding knowledge, belief, or intention,
enabling reasoning, problem-solving, and planning.

idea:
[sociology]
a socially shared construct or framework
that shapes norms, values, and collective behavior.

ideology,
 ideology:
 [economics]
 a conceptual lens influencing economic policies,
 social structures, and resource distribution.

 ideology:
 [philosophy]
 a system of ideas that interprets, justifies,
 and organizes beliefs about reality and values.

 ideology:
 [politics]
 a coherent set of political beliefs and doctrines
 guiding collective action and governance.

 ideology:
 [psychology]
 a structured set of attitudes and beliefs
 that guide perception and decision-making.

 ideology:

[sociology]
a shared framework of ideas
that shapes social norms, behaviors, and institutions.

mental construct:
representation of a specific subset of a mental state.

identity,
ethnonym:
[anthropology]
a prosoponym used to name a group of people,
signifying kinship and collective identity,
reflecting race/clan/nation,
expressing given/clan/nation name.

identity:
[anthropology]
p racially and historically constructed characteristics
that define a group,
maintaining distinctiveness across time and space.

identity:
[linguistics]
[semiotics]
p set of signs, labels, and categories
used to express membership or distinction.

identity:
[maths]
an equality which defines p same functions.

identity:
[philosophy]
p relation of a thing to itself that constitutes
its persistence and distinctness across time or contexts.

identity:
[politics]
p collective attributes, affiliations, and loyalties
that determine group membership and social boundaries.

identity:
[psychology]
p organized set of personal traits, roles, and self-perceptions
defining an individual.

identity:
[semiotics]
p meanings and symbols through which individuals or groups
actively define themselves in relation to others.

identity:
[sociology]
p socially recognized roles, categories, and affiliations
that define individuals or groups within a society.

identity:
personal identity:
p unique numerical identity of a person over time.

identical binary functions:
functions which have p same range and p same value
for each ordered pairs in p range.

identical functions:
functions which have p same range and p same value
for each argument in p range.

illocution act:
illocutionary act:
what was done.

illustration:
illustrate:
an expression of some examples to show
what sth means
or
how it is done.

illustration:
one or more examples showing what sth means or how it is done.

image of an object under function f :
(from set A to set B)
a well-defined object from B ,
yielded by passing an $a \in A$ under f .

image of function f :
 $f(A) = \{b \in B \mid b = f(a), \text{ for some } a \in A\}$.

image:
[semiotics]
a sign that represents its object by visually resembling it
or evoking a mental picture.

imagery:
[semiotics]
evoking sense impressions.

imaginary:
[arche]
a set of types and epitypes.

imperative:
[linguistics]
a formal syntactic category,
by a missing subject,
used for issuing directives.

implicature:
a non-literally expressed suggestive utterance.

implicit claim:
 there is an inferential relationship among propositions,
 without specific indicator-phrases.

impossibility:
impossible:
impossibly:
 false in all possible world.

impulse:
 p change in momentum of an object.
 p tendency to act without thinking.

incidence function:
 [BONDY]
 a function ψ ,
 which associates with each edge of G ,
 an unordered pair of vertices of G .

inconsistent:
 there is no line on which p truth-values are both true.

index,
 index:
 [semiotics]
 a sign that denotes its object by actual connection, contiguity,
 or causal relation.

 index:
 [semiotics]
 [PEIRCE]
 a sign which indicates an object.

inferential statistics:
 [WEISS]
 methods for measuring
 p reliability of conclusions about a population,
 based on information obtained from a sample of p population.

infinite-valued logic:
infinitely-many-valued logic:
real-valued logic:
 truth-values are continuous.

inflection,
 inflection:
 inflexion:
 morphological modification of a word
 to express grammatical relations.

 inflectional forms:
 different forms of p same lexeme.

 inflectional morphology:
 [GRAMMAR]
 p differences between p shapes of

↳ inflectional forms of variable lexemes.

influence:

↳ effect that sth has on ↳ way a sth act.

informal proof:

a rigorous non-formal proof.

information:

LAT:informātiōn-em.

↳ resolution of uncertainty.

innuendo:

an allusive indirect hint.

insight:

understanding sth within a specific context.

insinuation:

suggesting indirectly sth bad is true.

intelligence:

↳ capacity of

pattern-recognition/inference-identification/problem-solving.

PR/II/PS.

intelligible arbitrary code:

an arbitrary code may be transformed to an intelligible one,
by ↳ receiver, via decoding of arbitrary code.

interpretant:

[semiotics]

↳ mental effect or meaning produced in an interpreter by a sign.

interpretation of quantum mechanics:

an explanation of correspondence between
a mathematical theory of quantum mechanics and reality.

interpretation:

[logic]

a function that provides

↳ extension of symbols and strings of symbols of
an object language.

interpretation:

[philosophy]

↳ assignment of meanings to things under consideration.

interpretation:

↳ non-written communication of ↳ meaning
from a source-language
to a target-language.

interrogative:

[syntax]

[GRAMMAR]

a phrase or a clause,
typically used in formulating a *question.

intimation:
stating sth in an indirect way.

intuition:
gut-feeling:
[BRITANNICA]
p power of obtaining knowledge that cannot be acquired by
inference, observation, experience.

intuitionistic logic:
constructive logic:
constructive proof with rejection LEM and DNE.

inverse:
[logic]
turned upside down.

jargon:
technical language.

junk science:
fake scientific data.

justified/unjustified:
warranted/unwarranted:
grounds:
having a good reason for doing/saying/believing sth.

Khaos:
Azar:
GRC:χάος:chaos.
GRC:Πάντα ῥεῖ.
symbolizes
p ever-lasting Fire.

secures
Self-Physis.
p Orphic-Egg.
p Cosmic-Egg
certainty/eternity/infinity.

knowledge:
ENM:knaulage.
Justified True Belief.
JTB.

L-structure:
[model]
[HODGES]
if structure *A* has signature *L*.

language,
language:

[formal]
a set of symbols and formation rules allowing
manipulation according to specific rules; a formal language.

language:
[linguistics]
[semiotics]
a structured system of signs used for communication by
a speech community.

language:
[logic]
a symbolic system for expressing propositions and reasoning.

language:
[maths]
a formal symbolic system to describe
structures, patterns, or operations.

a priori language:
a constructed language whose elements are not borrowed
from or based on existing language.

constructed language:
conlang:
a devised non-natural language.

engineered language:
engelang:
a constructed language for some purpose.

experimental language:
an engineered language for linguistics.

fictional language:
a constructed language as part of a fictional setting.

logical language:
loglang:
an engineered language for logic.

metalanguage:
metalang:
[HILBERT]
DEU:metamathematik.
a language which describes
p language
or
another language.

natural language,
natural language:
natlang:
[linguistics]
A human language that evolves naturally,
structured by grammar

to express meaning and generate unlimited utterances.

natural language:

natlang:

[semiotics]

A naturally developed sign system

using conventional signs

to convey meaning in human communication.

philosophical language:

an engineered language for philosophy.

posteriori language:

a constructed language whose elements are

borrowed from or based on existing language.

sign language,

sign language:

[linguistics]

A natural language using

manual gestures, facial expressions, and body movements,
with its own grammar and syntax.

sign language:

[semiotics]

A visual-gestural sign system in which

conventional signs convey meaning

within a communicative context.

oral language,

oral language:

[linguistics]

language produced vocally through the mouth,

using speech sounds and phonological structures.

oral language:

[semiotics]

a system of vocal signs functioning as

a mode of communication within a sign system.

paralanguage,

paralanguage:

[linguistics]

non-verbal vocal features accompanying

speech-intonation,

pitch,

tempo,

volume-modifying

meaning.

paralanguage:

[semiotics]

paralinguistic signs that accompany primary signs,

providing contextual or emotive information.

spoken language,

spoken language:
[linguistics]
language expressed in real time through
articulation and auditory perception.

spoken language:
[semiotics]
a temporally unfolding system of signs
conveyed by vocalization.

vocal language,
vocal language:
[linguistics]
oral language specifically generated by
the vocal apparatus, including
phonation,
pitch,
prosody.

vocal language:
[semiotics]
vocal signs within a semiotic system,
where sound features carry communicative meaning.

written language,
written language:
[linguistics]
language represented visually through letters, symbols,
or characters, independent of immediate speech.

written language:
[semiotics]
a visual sign system encoding linguistic meaning for
transmission or storage.

law:
[sci]
a theorem with wide applicability.

lecture:
an oral presentation of information on a subject.

legend:
mythologic story.

lemma/lemmata:
GRC: λήμμα.
GRC: εἰλημμαί.
an auxiliary theorem,
being used for proving another theorem.

length:
the number of occurrences.

lexeme:
dictionary word:

[GRAMMAR]
a word in p abstract sense in a dictionary.

lexical morphology:
[GRAMMAR]
p formation of lexical bases.

lexicography:
p study of words and their meanings.

lexicon:
p vocabulary of a language
or
branch of knowledge.

lexis:
[GRAMMAR]
p stock of words in a language.

life:
p living organisms.

line:
an infinite number of points
follow a straight path.

lingua-universalis:
p unification of languages.

linguistic unit:
a discrete building block of linguistic analysis.

linguistics:
p scientific study of p nature and structure of language,
including its
 sound systems (phonetics and phonology),
 word and sentence formation (morphology and syntax),
 meaning (semantics),
 and use in context (pragmatics).

link:
[BONDY]
an edge with distinct ends.

linnaean taxonomy:
rank-based scientific classification of organisms

literal interpretation:
p historical reading.

literal translation:
direct translation:
 a word-for-word translation.

literature:
collections of written work.

loaded language:

loaded terms:

audience by using phrases with strong connotations
to influence p audience.

loan translation:

calque:

a phrase borrowed from another language
by literal word-for-word
or
root-for-root translation.

locate:

finding a position relative to some reference point.

locution act:

locutionary act:

what was said and meant

logic:

p formal analysis of statements and their inter-relations.

logical axiom:

formulae in a formal language that are universally valid.

logical reasoning:

logicality:

rigorous rationality via inferential argumentation.

logically equivalent:

same truth-value on each line

logistic system:

uninterpreted calculus:

uninterpreted calculi:

[CHURCH]

p formal part of a formal language,
in abstraction from p interpretation.

loop:

[BONDY]

an edge with identical ends.

machine learning:

[NORVIG]

p study of p ability to improve performance based on experience.

Magum:

adj.

of, or pertaining to Magi.

major premiss:

p one that contains p major term.

major term:

p predicate of p conclusion.

many-valued logic:

multi-valued logic:

multiple-valued logic:

truth-values are more than two.

mapping:

(from set A to set B)

an assignment of an object in B ,
to each object in A .

mathematical argument:

p conclusion depends on arithmetic

or

geometric computation.

mathematical proof:

a deductive argument for a mathematical proposition.

mathesis-universalis:

GRC:μάθησις.

LAT:mathesis.

p mathematical scientia-universalis.

matter:

any substance that has rest mass and volume.

measurement:

p quantification of properties of an entity,
by comparison with a standard.

medium:

[semiotics]

p physical channel through which signs are transmitted.

member of a class:

a set which satisfies p formula.

member of a set:

an objects which belongs to a set.

members of a class:

all sets which satisfy p formula.

members of a set:

objects which belong to a set.

mental:

adj.

of, or pertaining to
mind.

mental state:

a state of mind.

metabolism:
GRC:μεταβολή:change.
p set of life-sustaining chemical reactions in organisms.

metacognition:
self-awareness:
awareness of one's mental state.

metallogic:
p study of p properties of formal logical systems.

metaphor,
metaphor:
[semiotics]
a sign or expression that maps relational similarity
from one domain onto another.

metaphor:
[semiotics]
[PEIRCE]
a sign with parallelism in some other object.

metaphysical:
p subject matter of metaphysics.

metatheorem:
p set of semantical theorems
and
syntactical theorems.

metonymy:
sth is referred to by a closely related name.

middle term:
p one that occurs once in each premiss
and does not occur in p conclusion.

mind-demarcation:
imagination/non-thought/thought.

mind:
[APA]
p totality of an organism's phenomenal experienced processes
and
its related structural and functional cognitive components.

minor premiss:
p one that contains p minor term.

minor term:
p subject of p conclusion.

Mithra:
symbolizes
man.
death.

war.
fire.
Sun.
covenant.
secures
uncertainty.
ethos.
free will.

moderation:
avoiding extremes.

modern axiom system:
an axiom system which is true for new concepts.

mode,
mode,
mode:
[formal]
p type of formal language or symbols used.

mode:
[linguistics]
[semiotics]
p modality of sign production/reception
(verbal, visual, gestural, multimodal).

alethic logic:
modal logic about alethic modality.

alethic modality:
objective modality:
 $\Box P \rightarrow P$.
modality of 'is'-statements.
known entails truth, necessary entails truth.

alethic possibility:
p evaluation of alethic modality.

alethic truth:
p truth in p world.

deontic logic:
modal logic about deontic modality.

deontic modality:
DEO:
modality of obligations and permissions,
based on norms or laws, expressed by must/may/can.

deontic possibility:
p evaluation of deontic modality.

doxastic logic:
modal logic about beliefs.

epistemic logic:
modal logic about knowledge.

epistemic modality:
an alethic modality, based on epistemic truth.

epistemic possibility:
p evaluation of epistemic modality.

epistemology of modality:
p study of knowledge of modal claims.

imperative logic:
modal logic about imperatives.

linguistic modality:
p evaluation of modal relationship between
propositions and reality.

logical modality:
an alethic modality, based on rules of logic.

logical possibility:
p evaluation of logical modality.

metaphysical modality:
an alethic modality, based on possible worlds,
not-restricted by p laws of nature.

metaphysical possibility:
p evaluation of metaphysical modality.

modal:
varying degrees of truth based on modality.

modal logic:
p study of modal reasoning.

modal reasoning:
p evaluation of modality of a claim.

modality:
three modes of modality.
modalities of truth.
necessity/possibility/contingency.

modes of transmission:
three modes of transmission:
speech, writing, signing.

mood:
[ENGLISH]
a grammatical category associated with
p semantic dimension of modality.

mood:

[term]

$\Box$ letter-names of $\Box$ propositions which make it up.

navigation question:

how to move from one kind of modality to another.

nomic modality:

an alethic modality, based on laws of nature.

nomological determinism:

$\Box$ future is dictate by $\Box$ past and $\Box$ present,
due to causal determinism.

nomological possibility:

$\Box$ evaluation of nomic modality.

non-alethic modality:

modality of 'ought-to'-statements.

physical modality:

an alethic modality,
based on laws of physics.

physical possibility:

$\Box$ evaluation of physical modality.

provability logic:

modal logic about provability in a fixed theory of arithmetic.

subjunctive modality:

an alethic modality, based on counterfactuals.

subjunctive possibility:

$\Box$ evaluation of subjunctive modality.

temporal logic:

tense logic:

modal logic about tense (time).

temporal modality:

an alethic modality, based on temporal information.

temporal possibility:

$\Box$ evaluation of temporal modality.

model,

model:

[col]

an informative representation of a thing.

model:

(L -structure A is a model of theory T)

[model]

$A \models T$.

i.e. $\forall$ sentences ϕ in theory T are true.

business process model:
a conceptual model of processes of an enterprise.

classical model theory:
[model]
p model theory of 1st-order predicate logic.

concept model:
a model of a concept.

conceptual model:
a metamodel-based semantics model.

countermodel:
(L -structure A is not a model of theory T)
[model]
 $A \neq T$.

data model:
a conceptual model of organized relationship-based data.

data structure:
an algebraic structure about data values.

data type:
a collection of
 data values
 and
 p sets of their possible values
 and
 p sets of licit operations on p values.

data value:
data with an assigned mathematical object.

economic model:
a mathematical model of economic processes.

epistemological model:
a JTB-based metaphysical model.

fully interpreted:
(language)
[model]
a language wherein all its sentences have meanings.

function model:
a structured representation of functions within a systems model.

interpretation:
p mapping from L -structure A to every symbol in language L .

Logical model:
a model-theoretic model.

mathematical logic:

␣ mathematics of formal logical systems.

mathematical model:

a quantitative-based descriptive conceptual model.

mathematical philosophy:

anticonstructive mathematics.

meaningful sentence:

a sentence which is either true or false.

mental model:

a representative model of mental state.

metamodel:

a model of a model.

metaphysical model:

an explanative conceptual model.

model-theoretic semantics:

[model]

model-based interpretation of declarative clauses.

model theory:

[model]

␣ study of ␣ interpretation of a language
via mathematical structures.

model-theoretic truth:

truth in a particular interpretation.

parametric model:

a parametric-based statistical model.

probabilistic model:

a stochastic-based statistical model.

pseudosemantics:

[metaphysics]

to replace ␣ epistemological model of a language with
a post hoc conceptual model,
ergo a propter hoc interpretation.

scientific model:

an empirical-based descriptive conceptual model.

semantics model:

a conceptualized abstract model.

statistical model:

a statistical-based mathematical model
for data-generating process.

structured data:

data model based data.

systems model:
a conceptual model of a system.

unstructured data:
data without data model.

morpheme:
p smallest linguistic unit that
carries morphological or semantic content.

morphology:
p study of p internal structure of words
and p rules of word formation.

mores:
shared acceptable behaviours.

motif:
[semiotics]
a recurring distinctive theme/mood-generating idea
across a story.

multiple universes:
p different universes within p multiverse.

multiverse:
p hypothetical set of all universes.

myth:
a genre of mythologic folklore.

mythologia:
GRC:μυθολογία.
p story of clan/nation/civilization,
preserving art/ethos/science.

mythos:
GRC:μῦθος.
p story of art.

n -ary form:
a form containing one, two, three, ..., n free variable(s).
e.g. singular (unary), binary, ternary, ..., n -ary.

n -ary function:
a mapping from p set of n -tuples in A to B .

n -tuple:
(in set A)
a finite sequence of n objects in A .

name,
complex name:
[logic]
a name, which contains other names as constituent parts.

name:
common name:
[logic]
general noun.
common noun.
noun.

proper name:
[logic]
a name, which denotes (names) that of which it is a name.

name relation:
[logic]
[CHURCH]
p relation between a proper name and what it denotes.

name relation:
[logic]
[CHURCH]
p ternary relation between
 a language,
 a phrase,
 a denotation.

narrative exposition:
 background supporting information in a story.

nation:
 a federation of clans with shared
 philosophy/culture/territory.

necessary sentence (possible/contingent):
[col]
(sentence != proposition)
expressing a necessary (possible or contingent) proposition.

Necessitarianism:
 there is only one possible way for p world to exist.

necessity:
necessary:
 not possibly false.
 true in all possible worlds.

negative coherence-based rationality account:
 p absence of contradiction and inconsistency.

neighbour vertices:
[BONDY]
two distinct adjacent vertices.

neologism:
 a lexicalized nonce-word.

nomad:

a community with no fixed habitation.

non-logical axiom:

formulae that play a role of theory-specific assumptions.

nonce-word:

a recently coined phrase.

noninferential passage:

passages without claims of proving sth.

nonnull graph:

[BONDY]

a non-null graph.

nonsense-word:

a meaningless nonce-word.

nontrivial graph:

[BONDY]

a non-trivial graph.

nonword:

an unpronounceable nonsense-word.

norm:

GRC:γνώμων.

LAT:norma.

established ethos.

normative system:

a system based on some established norms.

normative:

pertaining to some established norms.

nothingness:

↳ negation of something.

↳ absence of anything.

↳ antithesis of everything.

noumenon/noumena:

a non-observable event.

null graph:

[BONDY]

a graph with no vertices, i.e. no edges.

numerals:

Roman numerals:

I, V, X, L, C, D, M.

numerals:

European numerals

0, 1, 2, 3, 4, 5, 6, 7, 8, 9.

objection:

- arguing against
 - a premise,
 - an argument,
 - or
 - p conclusion.

obscure:

- hidden meaning

observable universe:

- region of p universe which is observable from
 - Earth,
 - space-based telescopes,
 - exploratory probes.

observational study:

- [WEISS]
 - observing characteristics and take measurements,
 - thus revealing association.

obverse:

obversion:

- [logic]
 - changing quality without quantity,
 - and
 - replacing predicate with its term complement.

occurrence of a symbol in an expression:

- each appearance of a symbol in p expression.

one-valued binary function:

binary function:

a function of two arguments:

- an operation,
 - applying to a ordered pairs (two arguments in a certain order),
 - yielding a certain thing (value) for that ordered pairs,
 - in that order.

one-valued singular function:

function:

- [CHURCH]
 - an operation,
 - applying to something (argument),
 - yielding a certain thing (value) for that something.

one-valued n -ary function:

- [CHURCH]
 - an operation,
 - applying to n arguments in an order,
 - yielding a value,
 - provided p ordered system of n arguments,
 - is in p range of p function.
 - e.g. singular, binary, ternary, quaternary, ..., n -ary.

onomatopoeia:

a phrase which
imitates
or
resembles
p sound that it describes.

ontological commitment of a language:
[QUINE]
one or more objects postulated to exist
in p universe of discourse by p language.

ontological commitment:
[QUINE]
quantification entails ontological commitments.

ontologically committed to an object:
[QUINE]
p object occurs in all p ontologies of p theory,
i.e. theory is ontologically committed to an object.

ontology:
p theory of existence.

open-ended question:
a question,
which cannot be answered with
a yes or no response.

operand:
p argument of an operation.

operating procedure:
a set of procedures, to carry out some routine operations.

operation:
[maths]
a function,
from zero or more operands
to a well-defined value.

order of a graph:
[BONDY]
numbers of vertices of a graph.

order:
(on a set A)
a relation ($<$) $\ni$
 $\{x, y, z \in A \mid$
 $(x < y \oplus x = y \oplus y < x) \wedge ((x < y \wedge y < z) \rightarrow (x < z))$
 $\}$

ordered set:
a set in which an order is defined.

ordinals:
von Neumann ordinals.

organism:
any living thing that functions as an individual.

organism,
living thing:
[BIOLOGY]
an entity which satisfies seven properties:
order,
sensitivity,
growth,
development,
reproduction,
regulation,
homeostasis.

ought-to:
a might-is-right non-propositional clause.

paradigm:
a set of shared worldview.

paradox threats:
[type]
[TYPE]
p creation of less-intuitive mathematical systems,
creating 'impossible or undesired' 'situations or results',
caused by one or more of p following reasons:
a complexity or abstractness of p system.
formalisation of p system.
non-hominoid computers,
e.g. digital computers.

paradox:
[logic]
a somehow true contradiction.

parallel edges:
[BONDY]
two or more links with p same pair of ends.

paranoia:
they are out to get you.

Parham:
PE0:parhām:golden camel.
symbolizes
physis,
aka
nature.
secures
knowledge.

particle:
[sci]
a point-like object.

particular:
I, O.

path dependence:
past events
or
decisions constrain
future events
or
future decisions.

path:
[pattern]
points that appear together in a pattern.

Pathos:

Yasht:
GRC:πάθος.
GRC:ήδονή(ηδονιστικός)/έκστασις/(εκστατικός)/εὐφορία.
hedonistic/ecstatic/euphoria.
symbolizes
p ever-changing fire.
p ever-changing flux.
p ever-changing ocean.
secures
aseity.
from-self.
changing/becoming/process.

pattern-recognition:

PR:
classification of data based on patterns.

percept:

experience:
p joint product of p stimulation and perception.

perception:

p process of interpretation of stimulation
into organized experience.

perfect:

satisfying all specified properties.

performative utterance:

sentences which change p social reality they are describing.

perimeter:

length of a straight-sided shape's outline.

perlocution act:

perlocutionary act:
what happened as a result.

personal identity:

[SEP]

↳ unique numerical identity of a man over time.

personification:

giving living characteristics to non-living objects.

persuasion:

social influence:

influence in interpersonal relationships.

phenomenology:

↳ study of Psyche.

phenomenon/phenomena:

an observable event.

philosophical scepticism:

questioning ↳ possibility of knowledge.

phoneme:

↳ smallest unit of sound that can distinguish one word or morpheme from another.

phonetics,

phonetics:

↳ study of ↳ production, acoustic properties, and perception of speech sounds.

articulatory phonetics:

↳ study of how ↳ vocal tract organs produce speech sounds.

acoustic phonetics:

↳ study of ↳ physical properties of sound waves produced in speech.

auditory phonetics:

↳ study of how ↳ ear and auditory system perceive and process speech sounds.

phonology:

↳ study of ↳ abstract, systematic organization of speech sounds.

phrase:

[linguistics]

a grammatical expression of one or more words.

phrase structure:

↳ hierarchical organisation of words into constituents according to grammatical rules.

physical quantity:

a property,
which can be quantified by measurement.

physical:

GRC:τὰ φυσικά.
↳ subject matter of physics.

physicalism:
physical is hypostasis.

physics:
GRC:φυσική.
LAT:physica.
↳ science of physical quantities.

piece of advice:
making some recommendations about sth in ↳ future.

piety:
LAT:pietas.
one's fidelity towards his
clan/nation/deity.

platitude:
a prosaic meaningless thought-terminating cliché.

poetics:
GRC:ποιητικός.
↳ theory of structure, form and discourse within literature.

polemic:
↳ use of rhetoric
to support a position
and
attacking ↳ opposing position.

population:
↳ numbers of hominoid in a single area.

population:
[WEISS]
↳ collection of all objects under consideration
in a statistical study.

porism:
a mathematical proposition
or
corollary.

positive coherence-based rationality account:
↳ support which different mental states provide for each other.

possibility:
possible:
possibly:
not necessarily false.
true in at least one possible world.

possible world:
[SEP]

a situation which is
single,
maximally inclusive,
all-encompassing .

possible:
[logic]
 $a=b$

postulate:
[geometry]
statements about geometrical objects.

potentiality/actuality:
[arche]
prototype/antitype.

practical rationality:
what it is rational to do.

pragmatics:
[semiotics]
p study of how context influences p interpretation of meaning.
(principles).

predestination:
all events have been willed
by a supreme entity.

predeterminism:
all events are determined and known in advance.

presupposition:
a presumed acceptable proposition.

primary analogue:
p analogue mentioned in p premiss(es).

primitive proper name:
[logic]
an arbitrarily assigned name, to have a certain meaning.

primitive symbol:
a single indivisible symbol.

principal parts:
[linguistics]
forms of a verb which are p basis for all its conjugations.

problem-solving:
PR:
implement a transition function for a problem.
problem/non-problem/solution.

problem:
an NFA without a transition-function.

procedural method:

a standard or standing operating procedure.

procedure:

an ordered set of instructions.

prosody:

suprasegmental features of speech such as stress, rhythm, pitch and intonation that shape meaning and structure.

proof P of formula A :

[SHOENFIELD]

[9]

$\vdash$ last formula A in a proof P .

proof:

proof in formal system F :

[SHOENFIELD]

[10]

a finite sequence of formulae,
each of which either is an axiom or is $\vdash$ conclusion of a rule
whose hypotheses precede that formula in $\vdash$ proof.

proof:

it is impossible
for $\vdash$ premiss(es) to be true
and $\vdash$ conclusion to be false.

proper class:

ultimate class:

a class that is not a set.

protocol suite architecture:

reference model:

$\vdash$ modularized specification of $\vdash$ inter-relations,
among protocols of a protocol suite.

protocol suite reference implementation:

$\vdash$ implementation of protocol suite architecture.

protocol suite:

a set of protocols which satisfies some properties.

protocol:

[ir]

$\vdash$ etiquette of diplomacy and affairs of state.

protocol:

[ir]

(diplomatic)

$\vdash$ set of

principles,
procedures,
conventions

which relate to relations between states.

protocol:
[ir]
(legal)
an international agreement,
which amends or supplements a treaty.

protocol:
[sci]
a predefined procedural method
in p design and implementation of an experiment.

protocol:
an agreed upon system of
concept/principle/synchronization (s),
between two or more entities, via a common language.

protologism:
a popular nonce-word.

prove vb.:
to give proof of by action.

pseudoword:
a pronounceable nonsense-word.

Psyche:
GRC:ψυχή:life.
ANG:self.
LAT:ego.
p Self, p Ego, p I,
i.e. p observer.

psychology:
p science of phenomenology.

psychosis:
p loss of contact with reality.

pun:
an equivocal word play.

quale/qualia:
qualitative feature:
phenomenal propertie:
p qualitative, phenomenal or felt properties of
one's mental state.

quality:
[logic]
a feature of an object.

quantification:
p process of counting and measuring.

quantifier:

all; no; some.

quantity:

p measurable properties of some objects.

question:

[logic]

p denotation of an interrogative

question:

[pragmatics]

an illocutionary act,

seeking to obtain information from p addressee.

question:

[linguistics]

an utterance,

establishing a set of logically possible answers.

range:

range of a binary function:

p range of arguments of a one-valued binary function:

p ordered pairs in which p function is applicable.

range:

range of function f :

$\text{im}(f)$:

$f(A) = \{b \in B \mid b = f(a), \text{ for some } a \in A\}$

range:

range of function:

p range of arguments of a function:

p things in which p function is applicable.

range:

range of value of p binary function:

p values of p function for ordered pairs in which

p function is applicable.

range:

range of value of p function:

p values of p function for arguments in which

p function is applicable.

range:

range of p variable:

[logic]

p non-empty range of p possible values of p variable.

range:

possible values of p variable:

[logic]

p expressions of a language.

Rashnu:

symbolizes

justice.
secures
Nomos.
law.
ration,
Nous,
Nous:
intellect:
ration:
reason:
GRC:νοῦς.
LAT:intellectus.
p faculty of Psyche, perceiving Logos,
responsible for p process of reasoning.

arational:
non-Nous.

arationality:
being reasonable is N/A.

arationality:
being arational.

bounded rationality:
a rational agent can obey all p laws of logic.

coherence-based rationality account:
p relation of internal coherence between mental states.

derationalization:
p act of making derationalized

derationalize:
to deprive of reason

epistemic rationality:
theoretical rationality:
what it is rational to believe.

goal-based rationality account:
p relation to epistemic goals.

ideal rationality:
a rational agent obeys all p laws of logic.

irrationality:
not being reasonable

norms of rationality:
different accounts for forms of rationality.

Principle Of Sufficient Reason:
PSR:
everything must have a reason, cause or ground.

rationality:
p faculty of being rational

rationalable:
reasonable:
being guided by reasons via reasoning or otherwise.

rational:
being reasonable regarding non-arationality.

rationale:
p logical basis or rational basis.

rationality account:
how rationality is related to sth else.

rationality:
reasonability:
being reasonable

rationalizability:
p state of rationalizable

rationalizable:
that may be rationalized

rationality
irrationally:
in a rational manner

rationalness:
p state of being rational

rationate:
ratiocinate:
reason:
to reason

rationing:
rationment:
ratiocination:
p act of reasoning

rationless:
reasonless:
irrational:
unreasonable:
not being reasonable regarding non-arationality.

reason-based rationality account:
p relation to a reason that justifies or explains
p rational state is central.

reason:
p faculty responsible for p process of reasoning.

reasonably:
reasonfully:
in a reasonable manner

reasoned:
provided with reason.

reasoner:
one who reasons.

reasoning:
securing p norms of rationality.

reasonist:
a professed reasoner.

reductio ad absurdum:
argumentum ad absurdum:
argument to absurdity:
 establishing p truth or p validity of a proposition
 by showing p acceptance of p opposite
 leads to contradiction or absurdity.

reductio ad impossibile:
indirect proof:
proof by contradiction:
 establishing p truth or p validity of a proposition
 by showing p assuming p proposition to be false
 leads to a contradiction.

reference:
 [semiotics]
 p relation by which linguistic expressions pick out
 entities or situations in p world or discourse.

referent:
 [semiotics]
 p thing that is identified by a linguistic expression.

reincarnation:
 GRC:μετεμψύχωσις.
 rebirth.

relational signature:
 [model]
 [HODGES]
 a signature L with no constants symbols or function symbols.

relational structure:
 [model]
 [HODGES]
 an L -structure with relational signature.

relevancy:
 premisses are logically irrelevant to p conclusion.

report:

one or more statements
which convey some information about sth.

representamen:

[semiotics]
p form or vehicle of a sign that presents p signified
to an interpreter.

reverse:

[logic]
contrary or opposite of sth.

rhetoric:

p theory of persuasion.

rhetorical device:

emotive linguistic techniques.

rhetorical figure:

figure of speech:
rhetorical effect via non-ordinary phrases.

ring theory:

p study of rings.

root:

root word:

radical:

[linguistics]
[ALLEN]
p simplest form attainable by
analysis of a word into its component parts.

[linguistics]
[GRAMMAR]
a core element which remains
when all affixes have been removed from a complex word.

rule,

rule:

[maths]
a theorem that establishes
a useful formula.

rule:

[OED]
a principle,
regulation or maxim,
governing individual conduct.

rule:

rule of inference:

rule of procedure:

a principle of a formal system,

which concludes theorems from p axioms,
according to some criteria.

rules:

[linguistics]
[semiotics]
phoneme, morpheme, syntax, semantics.

sample:

[WEISS]
a part of p population from which information is obtained.

sapience:

p ultimate reality,
p Aletheia of all things,
p inner philosophy.

satisfiability:

satisfiable:

true under at least one interpretation.

saying:

any concise and memorable expression.

scalar quantity:

a quantity which has only a magnitude.

scepticism:

questioning knowledge claims.

science:

LAT:scientia-rationalis.
p systematic classification of art.

science-ab-initio demarcation:

p ability of demarcating between science and non-science.

scientia-universalis:

DEU:Universalwissenschaft.
p unification of knowledge.

scientific:

of or pertaining to science.

scientific method:

empirical methods for acquiring knowledge.

scientific theory:

a scientifically testable explanation of an aspect of p world.

se-3laws:

lack of 3laws $\Rightarrow$ simplex communication $\Rightarrow$ monologue.

se-arche:

lack of arche $\Rightarrow$ ad hoc worldview/arguments $\Rightarrow$ irrationality.

se-natlang:
lack of natlang $\Rightarrow$ full-duplex radio static $\Rightarrow$ unintelligible.

secondary analogue:
p analogue mentioned in p conclusion.

self-control:
having control over mental state and behaviour
when it is under attack.

semantic,
semantic:
[semiotics]
of, pertaining to, or characteristic of meaning.

semantics:
[computing]
p mathematical study of p meaning of programming languages.

semantics:
[formal]
assignment of interpretation to expressions to define
their meaning or validity in a model.

semantics:
[linguistics]
study of meaning in language, including
reference and conceptual relations.

semantics:
[logic]
p study of mappings from formulas to
truth-values or interpretations within a model.

semantics:
[psychology]
how meaning is stored in p mind.

compositional semantics,
compositional semantics:
[formal]
mapping compound expressions to outcomes derived
systematically from constituent symbols.

compositional semantics:
[linguistics]
study of how larger expressions derive meaning
systematically from their parts and structure.

compositional semantics:
[logic]
p interpretation of complex formulas based on
p interpretations of components
(model-theoretic semantics).

dynamic semantics:

[logic]
p interpretation of formulae as a function of updating context.

formal semantics:
semantics of logic:

[logic]
p study of interpretations of formal languages.

lexical semantics,
lexical semantics:
[computation]
modeling word meanings for NLP applications.

lexical semantics:
[linguistics]
study of
word meanings,
sense relations,
lexical fields.

semantic ambiguity:
semantic ambiguous:
[linguistics]
having multiple meanings.

semantic consistency of mathematical logic:
[logic]
a theory is satisfiable.

semantic consistency of term logic:
[logic]
a theory has a model.

semantic consistency:
[logic]
there exists an interpretation under which
all formulas in p theory are true.

semantic role:
thematic relation:
[linguistics]
p particular role played by an argument of a predicate.

semantic shift:
semantic change:
[linguistics]
[GRAMMAR]
a change in p meaning of a word taking place over time.

semantical study of axiom systems:
[logic]
p study of meaning of axioms and theorems as sentences.

semantical theorem:
[logic]
theorems of p semantical metalanguage.

semasiology:
[linguistics]
p study of lexical meanings and sense relations of words
in a language.

semiosis:
[semiotics]
[PEIRCE]
GRC:σημείωσις.
p process by which a sign represents an object
to an interpretant.

semiotic systems:
[semiotics]
an organized system of signs and rules enabling
p generation and interpretation of meaning.

semiotics:
[semiotics]
p study of signs, their production, use, and meaning,
encompassing p relations between signs, their objects,
and their interpreters.

sense,

sense:
connotation:
concept:
expression:
express:
Sinn:
[first]
[FREGE]
[CHURCH]
[1]
DEU:Sinn.
what is grasped when one understands a name.

sense:
[formal]
rarely used; formal systems focus on
syntax and derivation, not cognitive differentiation.

sense:
[linguistics]
p cognitive, differentiating aspect of
meaning within a language.

sense:
[semiotics]
conceptual or interpretive content of a sign.

sense:
connotation:
intension:
[term]

↳ qualities or attributes, which a term connotes.

connotation:

subjective meaning:

emotional meaning:

personal meaning:

[linguistics]

↳ additional meanings of a linguistic unit.

conventional connotation:

[logic]

↳ attributes a term often creates in ↳ minds of native-speakers.

denotation:

signification:

signify:

[first]

[linguistics]

DEU: Bedeutung.

↳ thing denoted by ↳ proper name.

denotation:

reference:

extension:

[term]

↳ members of ↳ class that ↳ term denotes.

denotation:

objective meaning:

factual meaning:

verifiable meaning:

[linguistics]

↳ primary meaning of a linguistic unit.

meaning:

meaning of a predicate:

[logic]

[FREGE]

a function, from ↳ domain of objects, to ↳ truth-values.

e.g. true and false.

semantic, meaning,

meaning:

an interpreted symbol.

meaning:

[linguistics]

what is signified by a linguistic unit.

attitudinal meaning:

affective meaning:

[linguistics]

a meaning conveyed by intonations or attitude.

cognitive meaning:

descriptive meaning:

[linguistics]
a meaning conveyed by facts

emotive meaning:
affective meaning:
[linguistics]
a meaning conveyed by emotions.

expressive meaning:
[linguistics]
a meaning conveyed by feeling.

grammatical meaning:
structural meaning:
[linguistics]
a meaning conveyed by grammatical structure.

lexical meaning:
dictionary meaning:
central meaning:
[linguistics]
a meaning conveyed by lexical item.

ideational meaning:
propositional meaning:
propositional content:
[linguistics]
a meaning which satisfies $\mathbf{p}$ principle of bivalence.

referential meaning:
descriptive meaning:
[linguistics]
a meaning in terms of referents.

social meaning:
interpersonal meaning:
situational meaning:
[linguistics]
a meaning conveyed by social context.

textual meaning:
[linguistics]
a meaning conveyed by textual context.

sempiternity:
infinite duration.

sense datum/data:
 $\mathbf{p}$ entities which are immediately known in sensation.

sensory nervous system:
a subset of $\mathbf{p}$ nervous system
responsible for processing sensory information.

sequence:
an ordered collection.

series:
 p cumulative sum of terms of a given sequence.

set:
 a unique collection.

shape:
 an image of a form.

sign:
 sth that stands for an object to an interpretant.

sign:
 [PEIRCE]
 a meaningful stimulus pattern.
 symbol/index/icon.

signature of a structure:
 [model]
 [HODGES]
 p set of constant elements of A ,
 and for each separate $n > 0$
 p set of of n -ary relation symbols of A ,
 and
 p set of of n -ary function symbols of A .

simile:
 describe sth in descriptive terms via comparison.

simple graph:
 [BONDY]
 a graph with no loops or parallel edges.

Simply-Typed Lambda Calculus:
 STLC:
 lambda calculus plus p type system.

size of a graph:
 [BONDY]
 numbers of edges of a graph.

sniglet:
 a humorous nonce-word.

social determinism:
 social interactions determine behaviours.

social unit,
 society,
 arrangement:
 recognised patterns of coordination.

 authority:
 recognised and legitimate capacity
 to command or enforce.

conceptual cohesion:
unity arising from shared ideas or meanings.

contract:
a deliberate agreement binding parties
to defined obligations.

formal structure:
an impersonal system of defined roles and relations
regulating collective action.

formalised authority:
authority defined by explicit rules or structures.

identity:
shared characteristics defining group membership.

institution:
a durable framework of roles and rules that
structures social behaviour.

institutionalised rule:
a rule consistently applied and upheld beyond
individual discretion within an established structure.

norm:
a socially accepted expectation of behaviour.

rule:
a directive governing conduct.

social unit:
a grouping recognised as a single entity.

society:
a structured network of individuals or groups
sharing norms, values, and institutions
to interact and maintain collective cohesion.

kinship system,
(grounded in blood)
[anthropology]

nuclear family:
co-resident parent(s), plus their dependent children.
(subset of family)

immediate family:
close kin by parent-child and sibling ties;
may include spouse.
(overlaps with nuclear family)

extended family:
kin group beyond the nuclear unit linked by descent.
(extension of family)

family:
social unit formed by kinship.
(umbrella term for nuclear/extended forms)
(basic unit of society)

clan:
unilineal descent group with common ancestor.
(fundamental unit of society)

tribe:
socio-political unit consisting of multiple clans
with common lineage, culture and dialect,
lacking formal state structures.
(above clan; below nation)

order:
racially patterned system of beliefs, rituals,
and ethical codes regarding p sacred.
(foundational unit of society)

ethnicity:
social category defined as perceived by
distinct and identifiable racial expressions.

race:
social category defined by shared ancestry, language,
history, and cultural markers,
perceived by phenotypic traits.

culture:
shared system of learned behaviours, symbols, values,
and practices transmitted racially.

nation:
large population sharing a common race,
a common culture, and a historical identity,
as possessing a political self-conception.

communal system,
(grounded in idea)
[sociology]

circle:
informal, loosely bounded association for
shared interest or connection.

group:
set of individuals who interact and perceive themselves
as a unit.

congregation:
unilineal descent group with common idea.
(subtype of community)

community:
population sharing locality, interests, or identity
with sustained interaction.

(larger, more structured group)

country:

a territory inhabited by a population,
identified as a coherent unit.

religion:

ideologically patterned system of beliefs, rituals,
and moral codes regarding þ sacred.
(macro-system containing congregations)

regime:

þ set of rules, norms, and institutions determining how
political power is acquired, organised, and exercised.
(governs how þ state operates)

political system,
(grounded in contract)
[politics]

team:

coordinated group organised for a defined task or goal.

alliance:

a formal agreement between independent states or
entities to cooperate for common purposes,
without creating a central authority.

state:

political organisation with central authority,
bureaucracy, population, and territory
exercising sovereign power.
(institutional structure above nation/community)

government:

þ institutions and officials
exercising executive authority of þ state.
(component of þ state)

federation:

state in which sovereignty is constitutionally divided
between central government and constituent units.
(type of state)

confederation:

union of sovereign states cooperating for
limited common purposes with weak central authority.
(above federation in looseness; below alliance)

Sophia:

Daena:

GRC:σοφία.

symbolizes

sapience.

secures

philosophy.

Sorouch:

Sraosha:

symbolizes
 conscience.
 observance.
secures
 Psyche.

species:

[logic]
a relatively smaller subclass of $\mathfrak{p}$ genus.

speculative philosophy:

[PROCESS]
[12]
 $\mathfrak{p}$ endeavour to frame a coherent, logical, necessary
system of general ideas in terms of which
every element of our experience can be interpreted.

speech act:

an utterance performing an action
through its conventional force.

speech:

$\mathfrak{p}$ animal communication via vocal language.

spenta mainyu:

ENG:furthering imaginary.
Logos-wise mind.

spoonerism:

a metathetic speech.

spurious relationship:

spurious correlation:

two or more variables are associated,
but not causally related.

standard operating procedure:

SOP:

an operating procedure for all units.

standard-form:

[logic]
all s are p ;
no s are p ;
some s are p ;
some s aren't p .

standard:

1.0 unit of $\mathfrak{p}$ quantity.

standing operating procedure:

SOP:

an operating procedure for some units.

statistical generalization:
a conclusion,
about a population,
inferred using sampling.

statistics:
[WEISS]
(used with a pl. vb.)
facts or data,
numerical or nonnumerical,
organized and summarized;
to provide information about a subject.

statistics:
[WEISS]
(used with a sg. vb.)
p science of organizing and summarizing
numerical or nonnumerical information.

steelmanning:
steel man argument:
to create p strongest case
by charitable interpretation of p opponent's argument.

stem:
word stem:
[linguistics]
[KROEGER]
a base from which all its inflected variants are formed.

[linguistics]
[ALLEN]
p body of a word, to which p terminations are attached.

story:
a series of related events or experiences.

structure:
[linguistics]
p relationships between
a linguistic units and its constituent parts
which determines its characterizations.

structure:
algebra:
algebra over a field:
[universal algebra]
a vector space together with a bilinear-map product.

structure:
algebraic structure:
[maths]
structure A is an object of four sub-objects:
a set,
a collection of operations on p set,
a finite set of identities,

satisfiable by $\mathcal{P}$ operations.

structure:

formal structure:

[logic]

a structure with regard to $\mathcal{P}$ form
in abstraction from $\mathcal{P}$ interpretation.

structure:

mathematical structure:

[model]

[HODGES]

structure A is an object of four sets:

a set of $\text{dom}(A)$,

a set of constant elements of A ,

a set of n -ary relations on $\text{dom}(A)$,

a set of n -ary operations on $\text{dom}(A)$.

structured proper name:

[logic]

[FREGE]

a complex name,

having a linguistic structure of meaningful constituent parts.

study:

$\mathcal{P}$ systematic analysis/synthesis/categorization of a system.

stylistic device:

techniques which induces auxiliary meaning.

sub-object:

an object which is a constituent-part of another object.

sub-objects:

objects which are constituent-parts of another object.

subcontrary:

[logic]

$\mathcal{P}$ relation that exists between two statements
that are necessarily not both false.

subordination:

[linguistics]

$\mathcal{P}$ syntactic embedding of one clause within another
to create complex sentence structure.

suggestive question:

an erroneously structured question,
in order to limit $\mathcal{P}$ response.

superstitious thinking:

assuming causality in $\mathcal{P}$ absence of causal link.

syllable:

a unit of spoken language typically consisting of
a vowel nucleus with optional onset and coda consonants.

symbol,

symbol:

[semiotics]

a sign that denotes its object by learned convention or rule rather than resemblance or causal link.

symptom,

symptom:

[semiotics]

an index that indicates its object through a causal relation occurring simultaneously with p object.

symptom:

[semiotics]

[PEIRCE]

a simultaneous causal index.

e.g. smoke and fire.

synecdoche:

part of sth is used to refer to p whole.

synonymous name:

[logic]

[CHURCH]

one name may always be substituted for p other, without changing of meaning.

syntax,

syntax:

[formal]

p arrangement of symbols according to formation rules.

syntax:

p study of p structure of sentences according to formal rules.

syntax:

[linguistics]

rules and principles organizing words into hierarchical structures.

syntax:

[logic]

study of structural rules for forming valid formulas.

syntax:

formation rule:

[logic]

[CHURCH]

p formal analysis of clauses.

syntax:

logical syntax:

[logic]

[formlang]

[CHURCH]

p study of p logistic system of a formal language.

syntactic:

 of, pertaining to, or characteristic of syntax.

syntactic consistency:

 p theory τ is consistent if
 there is no formula φ ,
 $\ni (\varphi \wedge \neg \varphi) \in (\text{consequences of } \tau)$.

syntactical study of axiom systems:

 p study of axioms and theorems as sentences.

syntax language:

 [CHURCH]

 p metalanguage of logical syntax.

elementary syntax:

elementary logical syntax:

 [CHURCH]

 p construction of a logistic system
 and

 p verification of its particular
 WFFs,
 axioms,
 proofs,
 immediate inferences.

object language:

mathematik:

 [HILBERT]

 p language being described by a metalanguage.

metasyntax:

 p syntax which being used to define p logical syntax.

theoretical syntax:

theoretical logical syntax:

 [CHURCH]

 p mathematical theory of a logistic system,
 about all p consequences of its formal structure.

system of notation:

 a quasi formal language,
 mixed with natural language.
 e.g. real number calculus.

system:

 a structured class.

systematics:

 p study of biodiversity and their inter-relationships.

tacit knowledge:

implicit knowledge:

 difficult to transfer/extract knowledge.

tale:
a succinct fictional story.

tautology:
tautologous:
logically true:
necessarily true:
true in every possible interpretation.
all true

taxonomy:
p identification, naming, and classification of organisms.

temperance:
voluntary self-restraint.

tense:
a grammatical category associated with
p semantic dimension of time.

term complement:
zero or more denotation(s) of a class complement.

term logic:
syllogistic logic:
traditional logic:
Aristotle's logic.
Aristotelian logic.

term:
a phrase which can be used as
p subject propositions
with a specific meaning
in a specific context.
e.g. proper names; common names; descriptive phrases.

terminology:
a set of terms,
their respective meanings,
in a specific field.

terms of a sequence:
objects which belongs to a sequence.

text:
a piece of
written language
or
spoken language.

theological determinism:
all events are preordained or predestined by a supreme entity.

theophany:
GRC:θεοφάνεια.

an antitype of p prototype from epitype.

theorem:

[col]
algorithm; formula; paradox.

theorem:

theorem of a formal system:

[arche]
a principle,
proved from p axioms,
satisfying some principles.

theorem:

theorem A of formal system F :

$\vdash_F$ theorem:

$\vdash$ theorem:

[SHOENFIELD]
[11]
formula A of F is a theorem of F
IFF
there exists a proof of A .

theory,

theory:
systematic explanation of some entities.

theory:
[model]
(theory T in language L)
a class of sentences.

Theoretical Computer Science:

TCS:

p study of theory of algorithms and complexity theory.

theory of algorithms:

p design and analysis of effective procedure

theory of computation:

p study of

p fundamental capabilities and limitations of computers.

thinking n .:

[APA]
cognitive behaviour in which hypothetical elements of thought,
e.g. ideas, images, mental representations, etc.
are experienced or manipulated.

thought n .:

p process of thinking.

Titan:

GRC:ὁ Τίταῦν sg.
GRC:οἱ-Τίταῖνες pl.
anarch-deity.

track,
 track:
 [semiotics]
 an index that indicates its object through a causal relation
 that occurs after p object acts.

 track:
 [semiotics]
 [PEIRCE]
 a non-simultaneous causal index.

trait:
 a noticeable feature of sth.

transcription:
 [bio]
 p process of copying a segment of DNA into RNA.

transcription:
 [linguistics]
 p systematic representation of spoken language
 using written symbols.

translation:
 p written communication of p meaning
 from a source-language to a target-language,
 via three-way handshake interpretation.

transliteration:
 p conversion of letters
 from a source-alphabet
 to a target-alphabet.

tribe:
 a large clan or a confederation clans,
 with a population of nearly 1200-1500,
 with shared folklores/mores/norms.

trivial graph:
 [BONDY]
 a graph with one vertex.

trivial:
triviality:
 [maths]
 an object which possesses a simple structure.

trivial:
triviality:
 a claim,
 obtainable from p context.

tropological interpretation:
 p figurative meaning.

truth,

lie:
p expression of non-truth.

liar:
p expresser of non-truth.

Truth:
p property of being in accord with reality.

logical truth:
analytic truth:
necessary truth:
a proposition which is true, under all possible interpretations,
in all possible worlds. e.g. tautology.

mathematical truth:
a theorem.

scientific truth:
a synthetic claim.
e.g. a posteriori.

semantic theory of truth:
truth is a property of sentences.

semantic truth:
a property of sentences.

truth-value:
logical value:
a property which indicates p relation of a proposition to truth.

vacuous truth:
vacuously true:
truth due to a false antecedent.
truth due to an empty subject-class.
truth due to an unsatisfied antecedent.

tuple:
a finite sequence.

two-valued logic:
bivalent logic:
satisfies p principle of bivalence.

type,
3type:
3type1 or 3type2.

3type1:
prototype/antitype/archetype.

3type2:
type/epitype/syntype.

6type:
prototype/antitype/archetype/type/epitype/syntype.

antitypal:
of, pertaining to, or characteristic of antitype.

antitype:
a manifestation of $\wp$ prototype, independent from Psyche.

archetypal:
of, pertaining to, or characteristic of archetype.

archetype:
a manifestation of $\wp$ prototype, independent from Psyche,
as a pattern.

epitypal:
of, pertaining to, or characteristic of epitype.

epitype:
a manifestation of $\wp$ prototype, in Psyche, as a pattern.

prototypal:
of, pertaining to, or characteristic of prototype.

prototype:
GRC:ἀρχέτυπον.
GRC:ἀρχέτυπος adj.
Kosmos, as $\wp$ one and $\wp$ many.

syntypal:
of, pertaining to, or characteristic of syntype.

syntype:
 $\wp$ manifestation of an archetype, in Psyche.

typal:
of, pertaining to, or characteristic of type.

types:
[type]
different classes of objects.

type:
GRC:τύπος.
a manifestation of $\wp$ prototype,
in Psyche.

typology:
 $\wp$ study of 6type/pattern/inference, and their inter-relations.

type theory:
[type]
a formal language of a type system.

unit:

[sci]
a unique name and symbol assigned to measures of a quantity.

unit:

linguistic unit:
[linguistics]
[GRAMMAR]
a discrete building block of linguistic analysis,
i.e. a word, phrase, clause, sentence.

unit of analysis:
p entity being studied as a whole.

unity == oneness !=one:
[metaphysics]
p absolute.
[PARMENIDES]
p universe.

universal algebra:
structures of 1st-order theories with no relation symbols.

universal algebra:
general algebra:
p study algebraic structures.

universal class:
universe:
p class of all sets,
for which proving a theorem.

universal turing machine:
a TM capable of computing any computable sequence.

universal:
A, E.

universe of discourse,
universe of discourse:
[logic]
[BOOLE]
p collection of objects being discussed in a specific discourse.

universe of discourse:
[logic]
p set of entities that a model is based on.

universe:
[arche]
p power set of space and time.

universe:
[maths]
a collection that contains all p entities in a given situation.

urelement:

an object which is not a set or proper class.

usage:

[linguistics]
[GRAMMAR]
established and customary ways of using language.

utility:

[economics]
a measure of p satisfaction from a state of p world.

utterance:

a continuous piece of speech,
enclosed by a pair of surrounding silence.

vagueness:

vague:

borderline cases.

value of function f :

p image of an object under f .

value:

[arche]
 p degree of importance of each member of a class.

variable

[maths]
[analysis]
a symbol,
whose denotation varies through p range of p variable.

variable:

syntactical variable:

metalinguistic variable:

metavariable:

[logic]
[SHOENFIELD]
a symbol,
i.e. any expression of a language,
whose denotation varies through p range of p variable
i.e. p expressions of p language,
with a fixed meaning throughout any one context.

vector quantity:

a quantity which has both
a magnitude
and
a direction.

verb paradigm:

[linguistics]
[ENGLISH]
 p set of inflectional forms of a variable lexeme.

verbal:

expressed in words,
spoken (oral) or written language.

vertex of a graph:

[BONDY]
a member of $V(G)$,
disjoint from E ,
indicated by a point.

virtue:

LAT: vitium.
a trait of excellence.

vocabulary:

a set of words in a language.

wager:

p use of probability in theology.

well-defined calculation:

a statement which can be expressed in terms of
its mathematical equivalent of p initialisation parameters of
a Turing Machine (Alan Turing),
or lambda-definability (Alonzo Church),
or general recursiveness (Herbrand-Gödel-Kleene),
or 1-definability (Emil Post).

well-defined expression:

unambiguous expression:

a well-defined expression.

well-defined value:

a well-defined value.

well-defined:

unambiguous:

[DUMMIT]
an object whose definition assigns it a unique interpretation.

whiskey speech:

if-by-whiskey:

not having a single position on a issue
and
ambiguously supporting both sides.

word,

word:

an instance of an inflectional form.

word:

orthographic word:

[GRAMMAR]

a meaningful unit of speech which is normally not interruptable.

word formation:

lexical word formation:

[GRAMMAR]

↳ formation of lexemes through
derivation,
compounding,
conversion.

word order:

[semiotics]

↳ linear sequence of words in phrases and clauses,
which contributes to syntactic relations and interpretation.

word play:

a wit,
using words as ↳ main subject.

word salad:

a sequence of phrases without meaning.

world:

LAT:mundus.
Kosmos,
known and unknown.

worldview,

cultural materialism:
material world determines behaviours.

mathematics:

↳ deductive study of metaphysics.

metaphysical idealism:

ontological idealism:

philosophical idealism:

mind is hypostasis.

metaphysics:

GRC:μεταφυσικά.

DEU:metaphysik.

↳ metalanguage of worldviews.

methodological materialism:

matter explains.

methodological naturalism:

nature explains.

natural theology:

physico-theology:

to know divinity, deductively from nature,
without reference to revelations.

ontological materialism:

philosophical materialism:

matter is hypostasis.

ontological naturalism:

philosophical naturalism:
nature is hypostasis.

philosophy:
p study of
aesthetics, ontology, epistemology,
formalism, politics, and ethics.

worldview:
a system of concept/principle/procedure (s).

Zurvan:
GRC:Χρόνος.
Chronos; Chronus; Khronos.
Zurvan/Anahita/Mithra.

Zurvanism:
p cult of Zurvan.

p Ancients:
Pelasgians:
palaeo-ubermen.

p foundation of civilization:
a confederation clan-based communities.

p foundation of nation:
clans,
geography,
culture,
state,
international relations.

p void:
nothingness manifested.

ω :
p set of natural numbers.

$\in$:
[set-membership]
p set-theoretic notation of membership relation.

FALLACIES

accentus:
fallacy of accent:
misleading accent:
reasoning from two different vocal-readings of
same written phrase.

accident:
a dicto simpliciter ad dictum secundum quid:
applying a general rule to an exception.

affirming a disjunct:
false exclusionary disjunct:
 $\alpha \vee \beta, \alpha \vdash \neg\beta$

affirming p consequent:
converse error:
fallacy of p converse:
 $\alpha \rightarrow \beta, \beta \vdash \alpha$

ambiguous middle term:
 using a middle term with multiple meanings.

appeal to accomplishment:
 he is well-accomplished,
 thus his claim is correct.

appeal to coincidence:
slothful induction:
 p rejection of p conclusion of an inductive argument,
 despite p strong inferential evidence.

appeal to motive:
 questioning p motives
 and
 dismissing p claim.

appeal to ridicule:
appeal to mockery:
p horse laugh:
 utilizing
 mockery
 or
 ridicule
 to end p conversation.

appeal to snobbery:
 p elites said so.

appeal to tradition:
appeal to common practice:
 it is old and traditional,
 thus it is correct.

appeal to vanity:
 p celebs said so.

appeal to p majority:
democratic fallacy:
 p majority said so.

appeal to p masses:
bandwagon argument:
 everyone said so.

arbitrary standard:
 uttering assertions,

claims or arguments,
without having any protocols.

argument from anecdote:
using anecdotal evidence to draw p conclusion.

argument from consensus:
p consensus said so.

argument from incredulity:
appeal to common sense:
divine fallacy:
it is hard to imagine or contradicts his mental state,
thus it's false.

argument from innuendo:
a veiled hinting attack on
character
or
reputation.

argumentum ad antiquitatem:
argumentum ad antiquitatem:
appeal to antiquity:
it is old and antique,
thus it is correct.

argumentum ad baculum:
appeal to p stick:
p use of force to secure p acceptance of a conclusion.

argumentum ad consequentiam:
appeal to consequences:
p premiss leads to desirable (or undesirable) consequences,
thus p hypothesis is true (or false).

argumentum ad crumenam:
appeal to wealth:
p speaker is rich (poor),
thus he is correct (incorrect).

argumentum ad hominem:
only attack,
no argument.

argumentum ad ignorantiam:
argument from ignorance:
it has not been or cannot be proven false (or true),
thus p claim is true (or false).

argumentum ad infinitum:
argumentum ad nauseam:
argument from repetition:
transforming an argument to a disposable platitude.

argumentum ad lapidem:

argument from stone:
 dismissing as absurd without revealing its absurdity.

argumentum ad lazarum:
appeal to poverty:
 p speaker is poor (rich),
 thus he is correct (incorrect).

argumentum ad logicam:
argument to logic:
argument from fallacy:
 p argument contains a fallacy,
 therefore its conclusion is false.

argumentum ad metum:
argumentum in terrorem:
appeal to fear:
 using fear to justify p alternative.

argumentum ad misericordiam:
appeal to pity:
p Galileo argument:
 utilizing one's feelings of
 pity
 or
 guilt.

argumentum ad novitatem:
appeal to novelty:
 it is new,
 thus it is correct.

argumentum ad odium:
appeal to spite:
 exploiting p audience's disdain for sth else.

argumentum ad passiones:
appeal to emotion:
 psychological manipulation via evoking emotions.

argumentum ad populum:
appeal to popularity:
 it is popular and held by many,
 thus it is correct.

argumentum ad superbiam:
appeal to flattery:
wheel greasing:
 using flattery and compliments to build support up.

argumentum ad temperantiam:
argument to moderation:
argument from middle ground
middle ground fallacy:
false compromise:
fallacy of gray:

p truth resides in p middle of two opposites.

argumentum ad verecundiam:

argumentum ad auctoritate:

argument from authority:

argument from expert consensus:

argument from expert opinions:

argument from experts:

argument from qualified authority:

argument from true authority:

an attempt

to equate expert opinions with
empirical evidence

or

controlled experiments

or

scientific results

or

to use expert opinions

at paradigm level

or

for deductive reasoning

or

for abstract systems

or

to appeal to

an influential figure

or

a presumed expert

or

a witness as evidence.

argumentum ergo decedo:

traitorous critic fallacy:

p arguer must avoid p entirely,
due to circumstantial ad hominem.

argumentum ex silentio:

argument from silence:

there is no known verbal source,
thus p claim is true.

association fallacy:

guilt by association:

some entities share p same properties,
thus they are p same entity.

base rate fallacy:

base rate neglect:

base rate bias:

ignoring p base rate.

boiling frog false cause:

ignoring that every causal state
in a 'boiling frog' metaphor
requires a separate argument.

bulverism:

assuming an argument has a mistake,
by explaining speaker's motive
which caused that mistake.

camel's nose false cause:

ignoring that every causal state
in a 'camel's nose' metaphor
requires a separate argument.

card stacking:

stacking p deck:

slanting:

utilizing p one-sided argument,
as a mass-propaganda technique.

cherry picking:

incomplete evidence:

ignoring most of p related data,
in favour of p approving ones.

chronological snobbery:

it is classic and has been done by p ancients,
thus it is correct.

circulus in demonstrando:

circular reasoning:

circular logic:

to begin with what he is trying to end with.

circumstantial ad hominem:

his affiliations/circumstances motivate p claim,
thus he is incorrect.

complex cause:

attributing an event or phenomenon to multiple causes
without clarifying their relative importance or validity.

compound question:

double-barrelled question:

multiple questions in one question,
which must be responded by one answer.

confirmatory question:

a presumptuous question
which limits p response to only one answer.

conjunction fallacy:

judging p probability of two events occurring together
as higher than that of either event alone.

continuum fallacy:

decision-point fallacy:

p rejection of existence of two or more distinct states
in continuum of states.

converse accident:
dicto secundum quid ad dictum simpliciter:
applying a rule which deals with an exception to all instances.

correlative-based fallacy:
p misuse of correlative conjunctions.

courtier's reply:
Myers shuffle:
no credentials,
no argument.

critical thinking:
assuming non-thinking is thinking.

cum hoc ergo propter hoc:
correlation implies causation:
with this, therefore because of this:
this correlates with that,
thus there is a causality between this and that.

definist fallacy:
defining a term in a biased or manipulative way
to support an argument.

definitional retreat:
deceitful allusion:
changing p meaning of a phrase to nullify an objection.

denying p antecedent:
inverse error:
fallacy of p inverse:
 $\alpha \rightarrow \beta, \neg\alpha \vdash \neg\beta$

denying p correlative:
introducing non-existent alternatives.

direct question:
demanding one-word answer to an open-ended question.

Domino Effect false cause:
ignoring that every causal state
in a Domino Effect requires
a separate argument.

double counting:
erroneous counting of number of occurrences,
so that p sum exceeds unity.

ecological fallacy:
population fallacy:
inferring a property of sample from that of p population,
based on statistical data.

entitlement to opinion:

he has a right to hold his viewpoint,
because somehow he is entitled to his opinion.

equivocation:

 p use of a specific phrase,
 in multiple senses,
 within an argument.

etymological fallacy:

 a word is defined by its etymology,
 not by its customary usage.

exclusive premisses:

 both premisses are negative.

existential fallacy:

 p lack of existential import in p premisses.

fallacy of composition:

 it is true for some part of whole,
 thus it is true for p whole.

fallacy of division:

 it is true for p whole,
 thus it is true for some or all parts.

fallacy of humanity:

 p phrase humanity is not vague nor ambiguous.

fallacy of presumption:

 p premisses presume what they want to prove.

fallacy of relative privation:

appeal to worse problems:

 it is not as bad as sth else somewhere else.

false analogy:

 an argument from analogy with weak analogy

false attribution:

 supporting a claim with
 fabricated source
 or
 biased source
 or
 irrelevant source.

false conjunction:

package-deal fallacy:

 things that traditionally grouped together
 are always supposed to be grouped together.

false dichotomy:

false dilemma:

false correlative:

 to dress two alt-statements up as two disjoint sets.

false equivalence:

false equivalency:

apples and oranges:

assuming equivalency between two entities,
based on some shared properties.

faulty generalization:

drawing a conclusion,
about many,
based on few instances.

forced choice question:

a question which erroneously limits p answer to
two or more options.

forking paths problem:

garden of forking paths:

to open up an alternative analysis paths,
based on different samples,
which increases p probability of making a Type I error,
during hypothesis testing.

formal fallacy:

logical fallacy:

deductive fallacy:

non sequitur:

a deductively invalid argument.

fortune telling:

unwarranted expectations about future events.

genetic fallacy:

not p origin of sth is p main criterion for evaluating a claim,
not p content.

hasty generalization:

drawing a general conclusion from unusual instances.

historian's fallacy:

rejecting time as a determining factor in
p quality perspective and availability of
information regarding events.

historical fallacy:

reading a process into p result
as p determining factor of p outcome.

homunculus fallacy:

to explain a concept,
in terms of p concept,
recursively.

ignoratio elenchi:

irrelevant conclusion:

missing p point:

a response,
dressed-up as p answer,
to p question.

ignoring a common cause:

failing to recognize that two correlated events
may stem from p same underlying factor.

illicit affirmative:

negative conclusion from affirmative premisses:

a negative conclusion yet both premisses are affirmative.

illicit analogy:

an argument from analogy with irrelevant analogy.

illicit contraposition:

p conclusion of an argument depends on
p contraposition of an E or I statement.

illicit contrary:

p conclusion of an argument depends on
an incorrect usage of p contrary relation.

illicit conversion:

p conclusion of an argument depends on
p conversion of an A or O statement.

illicit major:

p major term is distributed in p conclusion,
but not in p premiss.

illicit minor:

p minor term is distributed in p conclusion,
but not in p premiss.

illicit negative:

affirmative conclusion from a negative premiss:

a positive conclusion
and
one or two negative premisses.

illicit subalternation:

p conclusion of an argument depends on
an incorrect usage of p subalternation relation.

illicit subcontrary:

p conclusion of an argument depends on
an incorrect usage of p subcontrary relation.

illicit transference:

ignoring p difference between
distributive and collective sense of a term.

improper analogy:

an argument from analogy with defective analogy.

incomplete comparison:

an analogy with few numbers of similarities
between primary
and
secondary analogues.

inflation of conflict:

they disagree on sth,
thus not trust them an inch about anything.

intentionality fallacy:

to evaluate an argument based on p intention behind p claim.

inverse Monte Carlo fallacy:

inverse gambler's fallacy:

a less (or more) frequently-occurred event,
with independent and identically distributed random variables,
is more (or less) likely to have occurred in p past.

invincible ignorance:

ignoring given evidence
and
refusing to believe p argument.

ipse dixit:

just how it is:

an dogmatic assertion without proof.

is-ought fallacy:

to deduce a conclusion about what ought to be,
on p basis of what it is.

jumping to conclusion:

to assert an unjustified conclusion.

just because:

because I said so:

just trust me:

you will see:

refusing to respond by declaration of himself
as p ultimate authority on p matter.

kettle logic:

la logique du chaudron:

using multiple inconsistent arguments to support a claim.

labelling:

over-generalization of characteristics.

leading question:

a question which suggests a specific answer.

Linda problem:

committing p conjunction fallacy by
judging a detailed, stereotypical description
as more likely than a single general fact.

loaded label:

 p use of evocative terms to support a conclusion.

loaded question:

 a question which contains implicit assumptions.

logic chopping fallacy:

 concentrating on trivial details of p argument
 instead of dealing with key points.

ludic fallacy:

 using games as grounds for studies of chance.

lump of labour fallacy:

 there is a distributable fixed amount of labour available
 in p economy.

masked-man fallacy:

epistemic fallacy:

 p illicit use of Leibniz's law.

mind projection fallacy:

 one's view of sth reflects p reality of p thing.

mind reading:

 unwarranted assertion about mental state of others.

misleading vividness:

 to describe sth in an exaggerated vivid scenery,
 in order to dupe someone to believe that
 it's more important than sth else.

misplaced emphasis:

 changing p emphasis on syllables.

modal fallacy:

 confusing necessity with sufficiency.

modal scope fallacy:

 a degree of unjustified necessity is placed in p conclusion.

Monte Carlo fallacy:

gambler's fallacy:

 a less (or more) frequently-occurred event,
 with independent and identically distributed random variables,
 is more (or less) likely to re-occur in p future.

moralistic fallacy:

$\therefore$ bad, $\alpha \rightarrow \beta$, $\vdash \neg\alpha$.

motte-and-bailey fallacy:

 conflating two similar positions,
 one easy (motte) with p other which is hard to defend (bailey).

nirvana fallacy:

comparing things with idealized alternatives.

nitpicking:

fixating on unimportant details.

no true Scotsman:

appeal to purity:

protecting a generalization,
from one or more counterexample,
by altering p initial claim of generalization.

non causa pro causa:

false cause:

causal fallacy:

p incorrect identification cause(es).

non distributio medii:

undistributed middle:

p middle term is undistributed in both premisses.

non-sequitur:

[linguistics]
being absurd,
due to lack of meaning,
relative to former sentences.

nonsense utterance:

to present a declarative/interrogative clause,
as a statement/question,
while there is no semantic.

one-sided argument:

ignoring p counterevidence:

supplying p favourable reason and discarding p rest.

overwhelming exception:

an accurate generalization augmented with criteria
which discards many cases to p degree that
renders p generalization useless.

p-hacking:

data dredging:

data snooping:

to report only expected
or
apparently-significant results
of
a statistical test.

parade of horrors false cause:

ignoring that every causal state
in a 'parade of horrors' rhetorical device
requires a separate argument.

perfect-solution fallacy:

p rejection of a non-perfect solution.

persuasive definition:

a stipulative definition which stipulates
an uncommon or altered usage.

petitio principii:

begging p question:

assuming p conclusion:

p premisses assume p truth of p conclusion.

plurium interrogationum:

complex question:

a question with a complex presupposition.

poisoning p well:

discrediting a man by
presenting bad information about him,
thus he is incorrect.

pooh-pooh:

to dismiss a claim as being unworthy.

possibiliter ergo probabiliter:

appeal to possibility:

possibility, therefore probability.

post hoc ergo propter hoc:

after this, therefore because of this:

this followed that,
thus this has been caused by that.

presumptuous question:

a question with erroneously limited presumptions.

proof by assertion:

restating p same false proposition.

proving too much:

an argument where p conclusion has been rendered a corollary
by creating an over-generalized conclusion which too leads to
normative-absurdity of proving contradictions
outside of p argument itself.

psychologist's fallacy:

presupposing p objectivity of an observation.

quantitative fallacy:

McNamara fallacy:

to make a decision solely
based on quantitative observations,
while ignoring everything else.

quaternio terminorum:

four terms fallacy:

has four terms.

questionable cause:
assuming spurious relationship as causation.

quoting out of context:

quote mining:

contextomy:

altering p meaning of a passage by
removing its surrounding context.

raising p bar:

moving p goalposts:

shifting p goalposts:

changing p criterion of a ongoing process
to alter its objectives.

red herring:

misleading from relevant to irrelevant.

reduction fallacy:

oversimplifying a complex phenomenon by reducing it
to a single explanatory factor.

regression fallacy:

regressive fallacy:

ignoring natural fluctuations,
thus ascribing non-existent cause to
a regression towards p mean.

reification:

misplaced concreteness:

an abstracta is treated as a concreta.

repeated question:

repeating p same question so that
you think p 1st answer was incorrect.

retrospective determinism:

sth that happened under some circumstances
was bound to happen,
due to p circumstances.

reverse causation:

reverse causality:

wrong direction:

p cause and effect are reversed.

single cause fallacy:

assuming a phenomenon has only one cause,
ignoring other contributing factors.

slippery slope fallacy:

ignoring p possibility of existence of more states
between to states.

Snowball Effect false cause:

ignoring that every causal state

in a Snowball Effect
requires a separate argument.

socratic fallacy:
assuming one cannot know a concept
without defining it explicitly.

special pleading:
p rationalization of introducing an unjustified exception to
a general principle.

straw man fallacy:
strawman:
attacking an altered version of p argument.

style over substance:
aesthetic language
without content.

suppressed correlative:
fallacy of lost contrast:
redefining a correlative
so that one includes p other
which makes one alternative impossible.

suppressed evidence:
suppression of evidence:
p act of preventing evidence
from being shown
in a discourse.

survivorship bias:
survival bias:
paying attention to entities
which have passed through of a selection process
and
ignoring p rest.

syntactic ambiguity:
amphiboly:
a sentence,
with potential multiple interpretations,
due to ambiguous syntax.

Texas sharpshooter fallacy:
ignoring p differences
and
emphasizing p similarities.

third-cause fallacy:
attributing a direct causal link between two events
when both are caused by a third factor.

thought-terminating cliché:
cliché thinking:
semantic stop-sign:

uttering some folk-wisdom cliché
to shut down p conversation.

tone policing:
he doesn't like your tone of voice,
thus he is correct.

trivial objection:

quibble:

quillet:

hair-splitting:

uttering irrelevant objections,
in order to create distraction.

tu quoque:

p opponent's argument is inconsistent with his
worldview
or
behaviour
or
situation
thus he is a hypocrite.

two wrongs make a right:

his wrongful conduct is justified as a response to yours.

vicious circle false cause:

ignoring that every causal state
in a vicious circle
requires a separate argument.

wishful thinking:

irrational believe that sth good will happen.

p thin end of p wedge false cause:

ignoring that every causal state
in a 'p thin end of p wedge' idiom
requires a separate argument.
